LIST OF FIGURES

2. Input, Output, Storage and Transfer Elements of a Drainage Basin.
3. The Damodar Basin and its surroundings.
4. Geological Section of the Upper Damodar Basin.
5. Relief of the Damodar Basin.
9. Annual Number of Rainy days in the Damodar Basin.
10. Average Surface Runoff of the Damodar Basin in June.
16. Average monthly Rainfall in August.
17. Average monthly Rainfall in September.
18. Average monthly Rainfall in October.
22. Number of Rainy Days during the Monsoon months of the Damodar Basin.
23. Number of Rainy Days during the Post-Monsoon Months of the Damodar Basin.
24. Number of Rainy Days during the Winter Months of the Damodar Basin.

27. Physical units and meteorological stations of the Upper Damodar Basin.

29. Ramgarh and its surroundings.

30. Subcatchments of the Upper Damodar.

31. Water balance of the Upper Damodar Station: Hazaribagh (Based on evaporation and precipitation)

32. Water balance of the Upper Damodar Station: Hazaribagh (Based on Potential Evapotranspiration and Precipitation)

33. Water balance of the Upper Damodar Station: Ramgarh (Based on evaporation and Precipitation).

34. Water balance of the Upper Damodar Station: Ramgarh (Based on Potential Evapotranspiration and Precipitation).

35. Relationship between Rainfall, Runoff and Sediment for Lower Sewani Sub-catchment.

36. Relationship between Rainfall, Runoff and Sediment for Upper Sewani.

37. Relationship between Rainfall, Runoff and Sediment for Khanjo Subcatchment.

38. Relationship between Rainfall, Runoff and Sediment for Konar Subcatchment.

40. Relationship between Rainfall, Runoff and Sediment of Deonad.

41. Subcatchments of the Upper Barakar Basin.

42. Subcatchments of the Middle Damodar Basin.
43. Barhi and its surrounding.

44. Water Balance based on Evaporation and Precipitation at Barhi.

46. Bokaro and its surroundings.

47. Panchet and its surroundings.

48. Dhanbad and its surroundings.

49. Water Balance based on Evaporation and Precipitation at Panchet.

51. Water Balance based on Evaporation and Precipitation at Dhanbad.

52. Water Balance based on Potential Evapotranspiration and Precipitation at Dhanbad.

53. Water Balance based on Evaporation and Precipitation at Bokaro.

54. Water Balance based on Evapotranspiration and Precipitation at Bokaro.
