Acknowledgement

I express my deep sense of gratitude to Dr. N. Das, M.Sc (Cal), Ph.D. (London), Professor and Head of the Department of Agricultural Botany, for suggesting the problem and his constant inspiring and invaluable guidance during the course of the present investigation, but for which my work would have been infinitely more difficult, and in the preparation of the thesis, and providing necessary facilities in the Agricultural farm of the department of the Agricultural Botany and in the laboratory.

My thanks are also due to Dr. B.K. Baruah, the Head of the Department of Botany, for his keen interest and encouragement.

I record a deep sense of thanks to my husband, S.N. Baruah, for his unstinted help extended at the time of need. My thanks will remain due to other research scholars of the Department for helping me in carrying my works.

I sincerely acknowledge the kind favour of the Head of the Department of Geology for providing me the facilities in taking photoprints of the graphs in his laboratory.
I am extremely grateful to the Indian Council of Agricultural Research (I.C.A.R.) for the award of the scholarship in carrying out the present work under the Pineapple Research Scheme implemented in Gauhati University under the direct guidance of Prof. N. Das.

Mrs. Anuradha Baruah,
Department of Agricultural Botany.
Gauhati University.
