LIST OF FIGURES

Fig 3.1: The population of muga reelers in Sualkuchi.

Fig 3.2: Number of muga reeling cocoons produced during 1982-1992 in Assam.

Fig 3.3: Earning groups of muga reelers.

Fig 3.4: Calcium, Phosphorus and Iron contents of different varieties of muga waste pupae.

Fig 3.5: Biochemical constituents of different varieties of waste muga pupae.

Fig 3.6: Amount of extracted lipid in different varieties of muga waste pupae.

Fig 3.7: Acid, Iodine and Saponification values of extracted lipid of different varieties of waste muga pupae.

Fig 3.8: Chemical analysis of freshly dried muga waste pupae (raw & de-oiled).

Fig 3.9: Results of storage test.

Fig 3.10: Initial & final weights of chicks fed on control (C), E₁ and E₂ rations of Set –I experiment.

Fig 3.11: Comparative values of FER, PER, Nitrogen retentions of Set –I experiment.

Fig 3.12: Regression curve of growth of chicks of Set –I experiment.
Fig 3.13: Liver, heart, gizzard and giblet yield percentage of chicks fed on control (C), E₁ and E₂ rations of Set –I experiment.

Fig 3.14: Edible carcass percentage in chicks fed on control (C), E₁ and E₂ rations of Set –I experiment.

Fig 3.15: Economics of broiler ration incorporated with raw MSWPM and de-oiled MSWPM of Set –I experiment.

Fig 3.16: Initial & final body weights of chicks fed on control (C), E₁ and E₂ rations of Set –II experiment.

Fig 3.17: Edible carcass percentage in chicks fed on control (C), E₁ and E₂ rations of Set –II experiment.

Fig 3.18: Liver, heart and gizzard yield percentage of chicks fed on control (C), E₁ and E₂ rations of Set –II experiment.

Fig 3.19: Economics of broiler ration incorporated with de-oiled MSWPM of Set –II experiment.

Fig 3.20: Initial & final body weights of chicks fed on control (C), E₁ and E₂ rations of Set –III experiment.

Fig 3.21: Liver, heart, gizzard and giblet yield percentage in chicks fed on control (C), E₁ and E₂ rations of Set –III experiment.

Fig 3.22: Edible carcass percentage in chicks fed on control (C), E₁ and E₂ rations of Set –III experiment.

Fig 3.23: Economics of broiler ration incorporated with de-oiled MSWPM supplemented with antibiotic and probiotic of Set –III experiment.
