ACKNOWLEDGEMENTS

I would like to express my deep sense of indebtedness to my Guide Dr. K.G. Bhattacharyya, Professor and Head of the Department of Chemistry, Gauhati University who guided and supervised my research-work at every stage. His learned suggestions and encouragement is the essential force behind the completion of the present work.

I must express a word of gratitude to Dr. T.C. Baruah, Soil Science Department, A.A.U for all his helps, which he rendered during the course of my research work.

I am also indebted to Dr J. N Ganguly and all the other teachers of the Deptt. Of Chemistry, G.U for their help and co-operation.

I owe my thanks to the USIC, Gauhati University for providing me the opportunity to take help from the centre.

My thanks also goes to Bijay, Arunima, Hitesh, Parash, Gunin, Deepa and others for their help and co-operation.

At the home front, first, I would like to recall with a deep sense of reverence the inspirations I drew from my father late D. Khound and my father-in-law late Dr. G.C. Phukan. I believe, but for their affection and blessings it could not have been possible for me to complete the work.

I owe my gratitude also to my mother Mrs. M.Khound who had been a constant source of inspiration for me.

Thanks are also due to my sister-in-law Mrs. T.Bhattacharya, my elder brother Mr. B.Khound and my brother-in-law Mr. U. M.Phukan for all the helps and encouragement.

In the end, I must mention the role of my husband Shri U. Phukan, who supported me immensely all through my work. I am also grateful to my two sons: Buman and Suman for bearing with me, thereby providing me solitude for long hours, for completion of the present work.

Mrs. Smritishikha Khound Phukan
Lecturer, Department of Chemistry
Jagiroad college. Assam
