ACKNOWLEDGEMENT

I am deeply indebted to my thesis supervisor Prof. H. L. Duorah, my first teacher of Astrophysics and Cosmology, for inspiring me to enter to the exciting frontier—the gravitational wave. In particular, his special emphasis on avenues in gravitational wave astronomy through his lectures and discussions motivated me to concentrate for advanced studies and research on gravitational waves. He has agreed to guide me in the gravitational wave studies. Throughout the entire period of this work, I learnt many, not only the subject matter, but also the spirit of science and the qualities of being a good teacher! I remain ever grateful to him.

I must be thankful to my Astronomy and Astrophysics teacher Dr. (Mrs.) Kalpana Duorah, our Duorah Baidew, for her constant support to carry out my works. I really become emotional when Durah Baidew showers her motherly whip upon me for early completion of my thesis work!

Late Dr. Torun Chandra Phukon, a very good researcher and one of the best disseminators of knowledge in Astronomy and Astrophysics, has been a constant source of inspiration for me, even after his untimely demise in 2001. I had the opportunity to learn many of his ways to handle research problems. I am grateful to you Torunda!

I am thankful to the present and former heads, and the faculty members of the Department of Physics, Gauhati University for the logistic and other academic supports I received during the course of this work.

My extreme gratefulness to Professor M. K. Chaudhury, the Vice-Chancellor, Tezpur university for all the care and help he extended to me for early completion of my works. I extend my sincere thanks to the Registrar, Tezpur University, Dr. A. K. Buragohain, for the logistics and moral supports to me at various stages of my work.

I must sincerely acknowledge my friends Dr. S. M. Hazarika, and Mr. Dhiraj
Sarma, for facilitating me to use the High performance Machine, the Altix350, where most of the simulation works were done. I am also thankful to the entire library staff of Tezpur University for their special help to me during my work. My friends Dr. Nityananda Sarma and Mr. Bhabesh Nath deserve special acknowledgement for their help making the ZEUS-2D simulation code to work.

My departmental colleagues from the Department of Mathematical Sciences, Tezpur University deserve special mention for their cooperations- adjustment of classes and extending moral support to me for the completion of work at earliest possible time.

Interactions with Professor J V Narlikar, Professor S. V. Dhurandhar and Professor A. K. Kembhavi at Inter University Centre for Astronomy and Astrophysics (IUCAA), Pune, at different stages my work will remain as wonderful experience in me for all time to come! I was really benefitted in terms of widening the knowledge horizon in Astronomy and Astrophysics and gravitational waves. I remain thankful to the entire IUCAA family!

I would like to mention specially Dr. S. Yamada, Dr. K. Kotake, Dr. C. D Ott for clarifying many points as I got along with the work. Also, Dr. N. Andersson, Dr. K. D. Kokkotas, Dr. L Rezzolla, Dr. J Miller, Dr. Y. Kojima and Dr. G. Schäffer with whom I could interact and benefit

I will cherish the advice and suggestions form my revered teachers and senior colleagues, specially Prof. T. Choudhury, Prof. H. L. Das, Prof. A. K Borkakati. Their interest for early completion of my work keep boosting my morale during the progress of the work.

I know, my alltime seniors and friends Dr. Dipak Nath, Dr. Birendra Das, Dr. Chandan Goswami, Dr. Rajib Doley, Dr J K Sarma, Dr. Satyajib Bhattacharyya, Dr. Mukesh saikia, Dr. Gazi A. Ahmed, Mr. Tridib R. Sarma, and Mr. Ratul Nath will never mind even if I don’t thankfully acknowledge their being my friend-philosopher-and-guide at times.
My wife Gauri, and the little daughter Rechi are my wonderful friends! Very careful to create an academic ambience at my residence! For all the time during the work, they are the source of emotional inspiration to me. Thanks Gauri and Ruchi.

I salute my parents Baba, Mr. Jagannath Sarmah and Aama, Ms. Kaushalva Devi, my idols of honesty and sincerity! They invisibly encourage me to be sincere and honest in the career, particularly during the period of this work. Special thanks are due to my second home members Petap & Amaa and other members of the entire family Thahbhi, Madihali, Homania Bhawaj, Gomshada, Bhawaj, Thalbom, Tarn Nath, Samihani, Chapramani, Bambul, Yukaraj, Moon, Prakash and Debu for sharing many of my responsibilities either in relation to or outside the realm of my research works. The little kids Baba, Batu, Karishma, Namu, Aditya, Darpan, Tarn and Amicho are my real friends to play with. They are responsible to a large extent in breaking my monotony if I had during the course of my work.

At last my research group members Surenda, Simantada, Nandanda cannot be forgotten. They are the ever-ready moral supporters. I hope, Dr. Anjan Bhattacharyya and Dr. Deep Sarmah, my one time students, will continue to have various lively discussions in my chamber in future also. Bravo Anjan and Deep!
