TABLES

1. Number of patients admitted in different surgical units.  

2. Number of patients (duodenal ulcer) admitted in the surgical ward.  

4. Distribution of duodenal ulcer in relation to seasons.  

5. Distribution of duodenal ulcer cases in relation to age.  

6. Distribution of duodenal ulcer cases in relation to religion.  

7. Distribution of duodenal ulcer cases in relation to rural - urban difference.  

8. Distribution of duodenal ulcer cases in relation to language.  

9. Distribution of duodenal ulcer cases in relation to different districts of Assam and the neighbouring state.  

10. Distribution of duodenal ulcer cases in relation to religion.
11. Comparison of data on religion in relation to duodenal ulcer cases.

12. Distribution of duodenal ulcer cases in relation to sex.

13. Comparison of sex incidences in relation to duodenal ulcer.

14. Distribution of duodenal ulcer cases in relation to age.

15. Comparison of age group incidence in relation to duodenal ulcer.

16. Distribution of duodenal ulcer cases in relation to marital status.

17. Distribution of duodenal ulcer cases in relation to castes.

18. Distribution of duodenal ulcer cases in relation to education.

19. Distribution of duodenal ulcer cases in relation to rural urban residences.

20. Distribution of duodenal ulcer cases in relation to occupation.

21. Comparison of occupation in relation to duodenal ulcer cases.

22. Distribution of duodenal ulcer cases in relation to income.
23. Distribution of duodenal ulcer cases in relation to income per capita.

24. Distribution of duodenal ulcer cases in relation to self income member and dependant.

25. Distribution of duodenal ulcer cases in relation to working pattern and working hour.

26. Distribution of duodenal ulcer cases in relation to duration of illness.

27. Distribution of duodenal ulcer cases in relation to the duration of illness and literacy status.

28. Distribution of duodenal ulcer cases and their diagnosis.

29. Distribution of duodenal ulcer cases in relation to complain.

30. Distribution of duodenal ulcer cases in relation to water source.

31. Distribution of duodenal ulcer cases in relation to house type.

32. Distribution of duodenal ulcer cases in relation to diet.

33. Comparison of diet in relation to duodenal ulcer cases.

34. Distribution of duodenal ulcer cases in relation to their regularity in taking food.
35. Distribution of duodenal ulcer cases in relation to presence or absence of alcoholic habits.

36. Distribution of duodenal ulcer cases in relation to regularity of diet and alcoholic habits.

37. Distribution of duodenal ulcer cases in relation to smoking habits and different types of smokers.

38. Comparison of smoking habits in relation to duodenal ulcer cases.

39. Distribution of duodenal ulcer cases in relation to the number of bidis/cigarettes smoked per day.

40. Distribution of duodenal ulcer cases in relation to drinking tea and coffee.

41. Distribution of duodenal ulcer cases in relation to birth order.

42. Distribution of duodenal ulcer cases in relation to family type.

43. Sex wise distribution of duodenal ulcer cases among nuclear and joint family (both Hindu and Muslim).

44. Distribution of duodenal ulcer cases in relation to blood group (ABO).

45. Calculation of relative incidence of duodenal ulcer between different blood groups (ABO).

46. Summarised result of Table-44 and Table-45.

47. Comparison of blood group (ABO) in relation to duodenal ulcer cases.
