List of photographs

1. Seedling growth of pea (cv Aparna) treated with GA_3 (after 45 days)
   Plate 1.1. Control
   Plate 1.2. GA_3 10 µg/ml
   Plate 1.3. GA_3 100 µg/ml
   Plate 1.4. GA_3 250 µg/ml
   Plate 1.5. GA_3 500 µg/ml
   Plate 1.6. GA_3 1000 µg/ml

2. Seedling growth of pea (cv Aparna) treated with CCC (after 45 days)
   Plate 2.1. Control
   Plate 2.2. CCC 10 µg/ml
   Plate 2.3. CCC 100 µg/ml
   Plate 2.4. CCC 250 µg/ml
   Plate 2.5. CCC 500 µg/ml
   Plate 2.6. CCC 1000 µg/ml

3. Seedling growth of pea (cv Aparna) treated with Alar (after 60 days)
   Plate 3.1. Control
   Plate 3.2. Alar 10 µg/ml
   Plate 3.3. Alar 100 µg/ml
   Plate 3.4. Alar 250 µg/ml
   Plate 3.5. Alar 500 µg/ml
   Plate 3.6. Alar 1000 µg/ml

4. Seedling growth of soybean (cv PK-16) treated with GA_3, CCC and Alar
   4.1. Control after 40 DOS
   4.2. CCC 1000 µg/ml after 40 DOS
   4.3. Control after 30 DOS
   4.4. GA_3 500 µg/ml after 30 DOS
   4.1. Control after 40 DOS
   4.1. Alar 1000 µg/ml after 40 DOS

5. Pea plants (cv Azad P-1) showing flowers and pods treated with GA_3 and CCC
   Plate 5.1. GA_3 250 µg/ml
   Plate 5.2. GA_3 250 + CCC 250 µg/ml
   Plate 5.3. A single branch from plant treated with GA_3 250 + CCC 250 µg/ml
Plate 5.4. Plants with flowers and pods treated with GA$_3$ 250 + CCC 500 µg/ml

6. Pea plants (cv Azad P-1) showing flowers and pods treated with GA$_3$ and CCC

Plate 6.1. A single plant treated with GA$_3$ 100 + CCC 100 µg/ml
Plate 6.2. Plants with matured pods at GA$_3$ 250 + CCC 500 µg/ml
Plate 6.3. Experimental site for GA$_3$ and CCC interaction

7. Pea plants (cv Azad P-1) showing flowers and pods treated with GA$_3$ and alar

Plate 7.1. Experimental site for GA$_3$ and alar interaction
Plate 7.2. Plants with flowers and pods treated with GA$_3$ 250 + alar 500 µg/ml
Plate 7.3. A single plant treated with GA$_3$ 250 + CCC 500 µg/ml

8. Variation in length of pod and number of seeds per pod

Plate 8.1. Interaction of GA$_3$ and CCC
Plate 8.2. Interaction of GA$_3$ and alar

9. Growth and pod formation of soybean (cv Ankur) in interaction of GA$_3$ and CCC

Plate 9.1. Showing flowers and pods plants treated with GA$_3$ 250 and CCC 500 µg/ml
Plate 9.2. Showing flowers and pods plants treated with GA$_3$ 250 and CCC 1000 µg/ml
Plate 9.3. Showing flowers and pods plants treated with GA$_3$ 500 and CCC 1000 µg/ml
Plate 9.4. Showing flowers and pods plants treated with GA$_3$ 0 and CCC 1000 µg/ml

10. Growth and pod formation of soybean (cv Ankur) in interaction of GA$_3$ and CCC

Plate 10.1. Showing flowering and pods and pod filling stage GA$_3$ 250 and CCC 0 µg/ml
Plate 10.2. Showing flowering and pods and pod filling stage GA$_3$ 250 and CCC 100 µg/ml
Plate 10.3. Showing branches and pods treated with GA$_3$ 250 and CCC 1000 µg/ml

11. Growth and pod formation of soybean (cv Ankur) in interaction of GA$_3$ and alar

Plate 11.1. Luxuriant growth showing pods at GA$_3$ 500 and alar 250 µg/ml
Plate 11.2. Luxuriant growth showing pods at GA$_3$ 250 and alar 500 µg/ml
Plate 11.3. Luxuriant growth showing pods at GA$_3$ 250 and alar 250 µg/ml
Plate 11.4. Luxuriant growth showing pods at GA$_3$ 500 and alar 100 µg/ml
