ACKNOWLEDGMENTS

I take this opportunity to express my deepest sense of gratitude to Dr. N. Das, M.Sc.(Cal), Ph.D. (London), F.N.A.Sc. Prof. and Head of the Department of Agricultural Botany, Gauhati University, Assam, for suggesting this problem and for his talented and inspiring guidance both during the experimentation and preparation of the manuscript.

I am extremely grateful to Dr. P. P. Wamanan, M.Sc. (Agri), D.Phil.(Gau), Reader in Agricultural Botany and Prof. A. Borthakur, Lecturer in Statistics, Gauhati University for their constant encouragement and help in the analysis of data.

I am thankful to Prof. L. C. Goswami and my colleagues in the Department and friends who inspired me throughout the investigation.

Thanks are also due to Dr. P. Choudhury, Reader and Dr. M. Ahmed, Lecturer in the Department of Geology, Gauhati University for the help rendered in the photographic work.

Credit goes to Mr. A. Medhi, Department of Physics, Gauhati University for typing the manuscript.

Lastly, I thank my wife, Binoo Sarma for her constant inspiration and help.

(Rajeswar Sarma)
Department of Agricultural Botany, Gauhati University.
Words used in this thesis having common meaning:

1. Sowing time and sowing date.
2. Length of Earhead and Length of Ear.
3. Test weight and 1000-grain weight.
