Acknowledgement

At first I take this opportunity to express my profound sense of gratitude to Dr. G.U Ahmed, M.Sc, Ph.D., Reader in Food Biotechnology, Department of Biotechnology, Gauhati University, without whose valuable guidance, supervision and encouragement, it would not have been possible for me to complete this work.

I am grateful to Professor Dr. Soneswar Sarma, Former Head, Department of Biotechnology, Gauhati University for providing necessary field and laboratory facilities.

I am also grateful to Dr. G. Bhowmik, Head, Department of Biotechnology, Gauhati University for allowing me to carry out my work.

I offer my sincere thanks to Dr. S.P. Lal, Division of Plant Pathology, Indian Agricultural Research Institute, New Delhi for identification of fungus.

I am also grateful to the Head, Division of Plant Pathology, Indian Type Culture Collection, Indian Agricultural Research Institute, New Delhi for providing facilities.

The Director of Central Meteorological Department, Assam was very kind in allowing me to collect the necessary meteorological data of the study period.

I am grateful to Dr. J. Kalita, Department of Zoology, Gauhati University, for his valuable suggestions during the period of investigation.

I am indebted to Mr. N. Bhagobaty, Computer Science Division of Institute of Advanced Study in Science & Technology for his help in carrying out the statistical analysis of data and also for his help in the preparation of the manuscript.

My heartfelt indebtedness and gratitude is also due to my parents and my sisters, whose forbearance and support during this trying period was instrumental in bringing this thesis to light.
