ACKNOWLEDGEMENT

The work presented in this thesis was carried out in the Laboratory of the Botany Department, Gauhati University during 1986-1990.

This thesis is based on the problem suggested by Dr. K.N. Bora, M.Sc., D.Phil., Reader in Botany, Gauhati University. I wish to express my deep sense of gratitude and sincere appreciation to him for his continued interest and helpful guidance throughout the course of the investigation.

My sincere thanks are due to Dr. C.L. Boissya, M.Sc., FNAS, Ph.D. (London), FLS (London), Professor and Head of the Botany Department, Gauhati University for kindly providing me with the necessary facilities in the department during the period of the investigation.

I am also grateful to Dr. D.N. Baishya, M.Sc., D.Phil., Professor and ex-Head of the Botany Department, Gauhati University for providing me Laboratory facilities in the department and his helpful advice.

My sincere gratitude is due to Sri S.P. Medhi, M.A., Principal, Tihu College, Tihu for his kind permission to carry out the research work.
I express thanks and gratitude to Dr. R. N. Bhattacharjee, M.Sc., Ph.D., Lecturer in Botany, Cotton College, Guwahati, for his inspiration and helpful suggestions in the preparation of this thesis.

I am also grateful to Mr. N. Das, Analyst of the Soil Testing and Soil Survey Laboratories at Ulubari, Guwahati of the Department of Agriculture, Assam for his kind help during the course of the investigation.

My sincere thanks are also due to the staff members of the Botany Department, Gauhati University and the staff members of Tihu College, for their help and inspiration from time to time.

I wish to place on record my appreciation and thanks to the University Grants Commission, New Delhi, for the financial assistance.

(K.C. Sarmah)

Lecturer in Botany,
Tihu College, Tihu

Dated 5th February, 1990
