ACKNOWLEDGEMENT

It is indeed an immense pleasure for me to express my deepest sense of gratitude and indebtedness to my research guides Dr Karabi Dutta, Professor, Zoology Department of Gauhati University and Dr Binode Kumar Baruah, Selection Grade Lecturer, Department of Zoology, Cotton College, Guwahati Assam for their supervision, valuable guidance, painstaking and untiring help through deep and critical discussion during the period of investigation, without which this piece of research work would not have been completed. They were also a constant source of inspiration and encouragement during the period of investigation and preparation of this thesis.

I also acknowledge my sincere gratitude to the Head of the Department of Zoology, Gauhati University for providing the necessary facilities to conduct the research work and other faculty members of the Department for their constant encouragement and guidance during the course of the investigation.

In carrying out the work, I have received valuable assistance from different persons in different stages of the investigation whose contributions I record here with my sincere gratitude. I am grateful to Dr Satyendra Kumar Choudhury, Selection Grade Lecturer of the Department of Chemistry, Cotton College, Guwahati for providing me facilities to carry out some of my experimental works in the Departmental Laboratory. I am grateful to Dr Rekha Deka, the then Principal of B. Borooah College, Guwahati and Dr Dinesh Baishya, the present Principal, Syed Tariful Islam, the Head of the Department of Zoology and Sri Wooma Sankar Debnath, the Librarian of the College for allowing me to undertake some of the experimental works in the Departmental Laboratory as well as use of the college library for my research work. I would also like to take the opportunity to offer my gratitude to all my colleagues of the Zoology
Department of B. Borooah College for their help and encouragement during the course of my study. Besides the B. Borooah College Library, I availed the library facilities at the K.K. Handiqui Library of Gauhati University, Library of Institute of Advance Study in Science and Technology (IASST), Guwahati and Dr S.K. Bhuyan Library of Cotton College, Guwahati. I sincerely express my appreciation for the help provided by the staff of these libraries.

I offer my heartiest thanks and deep sense of gratitude to the management of the Galvanizing industrial unit of the Guwahati city to allow me to observe the functioning of the industry including treatment and discharge of the effluent. I am also thankful to Sri Jadab Kumar, the In-charge Engineer of the industrial plant for his kind cooperation and assistance during the course of my research. I am also thankful to Mrs Pranami Deka and Sri Gautam Mishra, both scientists of the Pollution Control Board of Assam for their help and guidance in understanding the various aspects of the effluents of the Galvanizing industry. I also offer my sincere and deep sense of gratitude to Dr Jadav Chandra Kalita of Banikanta College of Teacher Education, Guwahati for helping me to carry out the present research work.

My heartiest thanks also goes to Sri Niranjan Bhagawati, Institute of Advanceed Study in Science and Technology, Guwahati who took a lot of pain in helping me with the statistical analysis of data.

My sincere gratitude and special thanks are due to my husband Dr. Deepak Majumdar, my son Angshuman and daughter Anushree for their help and assistance.

Guwahati
