ACKNOWLEDGEMENTS

There have been so many people that have supported me during my research period to help me get here. I know it would not be possible for me to name everyone, but I am eternally grateful to each and everyone that has been there for me with their love and support.

I have great pleasure to express my deepest feelings of gratitude to my supervisor Prof. Anjana Kakoti Mahanta, for her invaluable guidance and unrelenting support. Her valuable suggestions and continuous encouragement have provided a good basis for the present thesis. It was a great pleasure to me to conduct this thesis under her supervision.

I am grateful to other teaching and non-teaching staff of the Department of Computer Science, Gauhati University, Guwahati for their valuable advice and support to carry out this work.

My sincere thanks to L. Sarbajit Singh, Kh. Manglem Singh, Suresh Babu and Tejmani Sinam for their vital assistance in my research work. I would also like to thank my family members and friends for their love, understanding and encouragement.

Finally and most importantly, I would like to thank my mother Medini and my father Doren who always encouraged me through all the way and who made everything possible to help me make it this far.
