ACKNOWLEDGEMENTS

I wish to express my thanks to the staff and graduate students friends of the Indiana University, U.S.A, where the present study had been initiated during 1970-71, for the valuable discussions relating to the problems of urban analysis. In particular, I owe a deep gratitude to Dr. John J. Hidere for his encouragement, valuable advice and helps of various kinds throughout the duration of my stay at the Indiana University. I am also indebted to Mr. Hemayet Hessain of Texas A and M University, U.S.A. for his sincere help in running the computer analysis without which it would not have been possible to bring this study into light.

Special appreciation is due to my adviser, Dr. H.P. Das, Professor and Head of the Geography Department, Gauhati University for his valuable advice and encouragement. I also wish to express my thanks to the other members of the Department for their valuable suggestions.

In preparing this study, I owe a particular debt to Miss D. Deka, Miss S. McCoy, Miss B. Kalita, Prof. D.K. Barthakur, Mr. K. Dutta and Prof. M.A. Sarmah for providing an pleasing and stimulating environment which aided the completion of this research. Finally, I express my thanks to Mr. J.K. Bhuyan and Mr. U. Roychoudhury for Cartographic works and Mr. K. Kalita who has taken care of the typing.
