The present study is to describe the cultural life and language of Tiwa community. The community itself is a branch of Indo-Mongoloid race and its language is sub branch of Tibeto Burman language family. The idea of systematic investigation of Tibeto Burman language of Assam first struck my mind some years ago when I was a post-graduate student where I prepared a mini thesis on 'The Mishing Language' for final examination.

In order to collect the data for this study I have visited many Tiwa populated area both hills and plains longtime. Many Tiwa and non-Tiwa people help me a lot for this occasion. The work consist of Tiwa culture and language. The language chapter I could not elaborately discuss with proper materials. Due to lack of linguistic training and phonetic equipment I could not add the phonemics chapter in present study. In spite of this I have traced my best to critically examine every topic on the basis of genuine investigation. I may be
mention that this study represents the first at research covering an important aspect of the Tiwa community. I do not claim to say the last word on the subject and invite the future researcher for further study.

Finally, I sincerely apologize for my poor expressions not only in Tiwa but also in English.
