Acknowledgements

Debts of gratitude are owed to a number of individuals and associates for assisting in my endeavors to complete this study. I would specially thank my guide Dr. PG Rao, Director, North East Institute of Science & Technology, Jorhat for his admirable care. His guidance, advice, constructive criticism and support during the years of study, is very gratefully acknowledged.

To my co-supervisor, Professor ML Das, Dean, Faculty of Engineering, Gauhati University, I express my heartfelt gratitude for his valuable advice, helpful suggestions and encouragement during the course of the study.

Particular thanks must be given to Dr. NN Dutta, Head of Chemical Engineering Division for his useful advice and encouragement. My thankfulness also goes to all the staff of Chemical Engineering Division of NEIST, Jorhat for their help and friendship.

The support of Dipankar during my computational exercises and Ashma, Parikshit and Richa for experimental help is as well gratefully acknowledged.

Finally, I must be grateful to my wife and son for their continual support and encouragement during the period of study.

Date: 10 December 2010
