ACKNOWLEDGEMENT

This small piece of my dream and aspiration could not have been scripted without those helping hands whose memories shall ever make me obliged to them.

While still in my 'Masters' course at the Department of Geological Sciences, Gauhati University, it was one of my most respected teachers, Prof. I M. Hazarika who instigated me to dream of further studies. His next advice was to get myself attached to Prof. P.K. Das, a personality of proven qualities. The encouragement, noble guidance and painstaking criticism that I received from my guide despite his being the Head of the Department always pumped my adrenalin. With a high spirit, I began to curve out my path.

However, the path of realising a dream cannot be smooth and, my case was not an exception. It almost turned sour in many steps but, by the grace of the almighty, there was always a helping hand in one form or the other.

I recall with gratitude, the advices, suggestions and encouragement that I received from Dr. K.P. Sarma, Reader in Geology. His viewpoints have been a motivating factor in me since my student days.

I take this privilege to offer my heartiest thanks to Dr. Shyamal Sengupta, Geologist, GSI for giving me a duplicate of the toposheet of my study area which, by virtue of its vicinity to Bangladesh was hard to access elsewhere. I was moved by the spirited words of Dr. P. Kotoky, Scientist, RRL, Jorhat while helping me in carrying out elemental analyses vide AAS. Thanks are due to my friend Mr. L.J. Singha, a fellow Research Scholar for getting the organic-carbon analyses done at RSIC, Shillong. Similar is the feeling to Mr. D. Das and Mr. S. Bardoloi courtesy whom XRF analysis of the sandstones and basic intrusives were done at the USIC, G U. I often cursed myself for incorporating palynology in my work-schedule for want of proper facilities at my department. It was Mr. Bipul Gohain and Mrs. Manisha Sarma, both Geologist, ONGC, Nazira, who courtesy Mr. Palling Sarma, a dear friend of mine, arranged for palynological studies at the Geology Department of ONGC, Sibsagar. The encouraging words of Mr. L. Singh, GM (Explorations) and Dr. R.K. Saxena, Geologist, ONGC, Sibsagar while in that venture were very pleasing.

Thanks are due to all the faculty members and official staffs of the Department of Geological Sciences, G.U., for their help at different stages of the work. Mentions may be made in this regard of Dr. A.C. Mazumdar, Reader for his help in carrying out petrographic analyses of basement and intrusive rocks, Dr. D.N. Das, Reader and Mr. J.J. Laskar. Part-time Lecturer for their help in carrying out photomicrography.

The help rendered by Mr. Napoor Bora and Mr. Bedabrata Phukan, both ex-students of the department in the field was a memorable one.

But for the love, affection, persuasion and interest of my parents, sister Tulika, her parents, this task would have been more uphill. The way they stood by me in this phase of my life, took interest in seeing me achieve my dream cannot be quantified by any words or quotes.
