Acknowledgement

In this auspicious moment it is the right place to devote my wills to God Almighty for initiating new thoughts and never emptied courage in all my attempts towards my research activities.

My deepest gratitude is to my advisor, Dr.R.B.Gnana Jothi. I have been amazingly fortunate to have an advisor who gave me freedom to explore on my own, and guidance to recover when my steps faltered. Throughout my research period she provided enough encouragement, adequate advice, compatible company, and innovative ideas.

Rejoicing completion is to recollect the past journey and remember all the learned professors, friends and family members who have accompanied me along this long but fulfilling road. I dedicate my whole hearted gratitude to Prof. Dr.Franco Scarselli, Department of Information Engineering, University of Siena, Siena, Italy for having laid a strong foundation for my research career by clearing my doubts through mail and sending the reprints of his recent work.

My sincere thanks are due to our Head of the Institution, Secretary and members of our College Managing Board for providing me necessary infrastructure facilities to carry out my research work. I would also like to thank our former H.O.Ds for their best wishes and continuous encouragement.

My thanks are due to Dr.V.Swaminthan, Dr.R.Baskaran, Dr.A.Rama for their valuable suggestions. I am grateful to all my colleagues for having induced confidence and courage to carry out this work upto the mark. I wish to thank Dr.Rajendra Prasath for journals highly essential for this research.
I am very much indebted to my family, my sons Yazhisai kumar and Kavin Iyal, my parents and mother-in-law, who supported me in every possible way. Finally, I would like to thank my husband Dr. T. Kathirvalavakumar. He has played triple role in this task, as life partner by shouldering the household responsibilities, as a counselor by cheering me up to move the work with increasing acceleration and as a subject expert by giving guidance and correction for this thesis.
