

ACKNOWLEDGEMENT

I express my deep gratitude to Dr. D.N.D. Goswami, Professor and Head of Geology Department, Gauhati University for his constant supervision and valuable suggestions through the course of the present investigation. I am also thankful to Dr. J.M. Choudhury, D.I.C., Ph.D. (London), the then Senior Professor and Head of the Geology Department, Gauhati University and the present Vice-Chancellor of Gauhati University who was kind enough to provide me with necessary laboratory facilities. I am equally thankful to Dr. C.C. Bhattacharya and Dr. M.N. Rao, Professor and Dr. S. Rahman, Reader in the Department of Geology, Gauhati University for stimulating interest shown during the preparation of the thesis. I also extend my thanks to Sri S.K. Bhattacharya, Director, Geology & Mining, Assam for allowing me to use the Departmental Laboratory for chemical analysis, and to Dr. T. Kataki, Reader and Head of the Department of Applied Geology, Dibrugarh University, who offered helpful suggestions in the infrared spectra analysis. I am no less thankful to Sri J.R. Barthakur, Senior Chemist for rendering valuable help in preparation of chemical analysis.

Lastly, I also express my sincere acknowledgement to Dr. I.C. Chakravorty, Chairman in the Department of Mathematics, Ontario University, Canada, for his valuable helps in X-ray analysis.

Date 20th March, 1984.

A. Bhattacharya
Mrs. Aruna Bhattacharya (Sarmah)
Guwahati.
