ACKNOWLEDGMENT

The author takes this opportunity to express his profound gratitude to Dr. J. N. Choudhury, M.Sc., D.I.C., Ph. D. (Lond.), F.G.S., Professor and Head of the Department of Geology, Guwahati University, for his able guidance and supervision during the course of the research and valuable suggestions in the preparation of the thesis.

Special thanks are due to Dr. N. V. N. Murthy, B.Sc.,(Agra.), A.I.I.Sc, Ph. D. (Glasgow), Deputy Director General, Geological Survey of India, from whom the author received continuous encouragement and constructive suggestions during the course of this research.

To Prof. Preston E. Cloud of the Department of Geology, California University, U.S.A., the author is very much grateful for his brief association during the field work and for providing guidelines for this research.

For various helps by way of field and laboratory guidance during the final stage of the research as well as for helpful criticisms and valuable suggestions, the author is very much indebted to Dr. (Nadem) Maria E. Naumen of the Geological Institute, Academy of Sciences, U.S.S.R., Moscow.
A deep sense of gratitude is reserved for Prof. K. K. Valdiya of the Geology Department, Jesus University, Palghar, India, for encouraging the author during this research investigation.

The author thanks Dr. K. K. Valdiya, Palaeontologist-in-Charge, Western Region, Geological Survey of India, for giving guidance during the entire course of the research.

Thanks are also due to Dr. V. D. Mathur for being a constant source of encouragement to the author all along the research and for rendering help in photomicrography.

Successful completion of this research has been due mainly to the continuous encouragement received by the author from his wife Mrs. Vishanta Raman, whose support received from the author's son Master Amarn in arranging the photos is also acknowledged.
