LIST OF TABLES

Table 1.1 Percentage of allochem, orthochem and void in the limestone of block no. I (Surface samples).

Table 1.2 Percentage of allochem, orthochem and void in the limestone of block no. I (bore hole samples).

Table 1.3 Percentage of allochem, orthochem and void in the limestone of block no. II (Surface samples).

Table 1.4 Percentage of allochem, orthochem and void in the limestone of block no. II (bore holes samples).

Table 1.5 Percentage of allochem, orthochem and void in the limestone of block no. III (Surface samples).

Table 1.6 Percentage of allochem, orthochem and void in the limestone of block no. III (bore holes samples).

Table 2.1 Classification of the limestone (avoiding replacement minerals and void) of block no. I (Surface samples).

Table 2.2 Classification of the limestone (avoiding replacement minerals and void) of block no. I (bore holes samples).

Table 2.3 Classification of the limestone (avoiding replacement minerals and void) of block no. II (Surface samples).

Table 2.4 Classification of the limestone (avoiding replacement minerals and void) of block no. II (bore holes samples).

Table 2.5 Classification of the limestone (avoiding replacement minerals and void) of block no. III (Surface samples).

Table 2.6 Classification of the limestone (avoiding replacement mineral and void) of block no. III (bore holes samples).

Table 3.1 Sub-classification of the limestone of block no. I (Surface samples).

Table 3.2 Sub-classification of the limestone of block no. I (bore holes samples).
Table 3.3 Sub-classification of the limestone of block no. II (Surface samples).

Table 3.4 Sub-classification of the limestone of block no. II (bore holes samples).

Table 3.5 Sub-classification of the limestone of block no. III (Surface samples).

Table 3.6 Sub-classification of the limestone of block no. III (bore holes samples).

Table 4.1 Model analysis of the stained thin sections—percentage of L.M.C., H.M.C. and aragonite in the limestone of block no. I (Surface samples).

Table 4.2 Model analysis of the stained thin sections—percentage of L.M.C., H.M.C. and aragonite in the limestone of block no. I (bore holes samples).

Table 4.3 Model analysis of stained thin sections—percentage of L.M.C., H.M.C. and aragonite in the limestone of block no. II (Surface samples).

Table 4.4 Model analysis of stained thin sections—percentage of L.M.C., H.M.C. and aragonite in the limestone of block no. II (bore holes samples).

Table 5.1 Model analysis of the stained thin sections—percentage of non-ferroan calcite, ferroan calcite and aragonite in the limestone of block no. I (Surface samples).

Table 5.2 Model analysis of stained thin sections—percentage of non-ferroan calcite, ferroan calcite in the limestone of block no. I (bore holes sample).

Table 5.3 Model analysis of stained thin sections—percentage of non-ferroan calcite, ferroan calcite and aragonite of the limestone of block no. II (Surface samples).

Table 5.4 Model analysis of stained thin sections—percentage of non-ferroan calcite, ferroan calcite and aragonite in the limestone of block no. II (bore holes sample).
Table 5.5 Model analysis of the stained thin sections—percentage of non-ferroan calcite, ferroan calcite and aragonite in the limestone of block no. III (Surface sample).

Table 5.6 Model analysis of the stained thin sections—percentage of non-ferroan calcite, ferroan calcite and aragonite in the limestone of block no. III (bore holes sample).

Table 6.1 Statistical parameters for corrected thin section analyses of the limestone of block no. I.

Table 6.2 Statistical parameters for corrected thin section analyses of the limestone of block no. II.

Table 6.3 Statistical parameters for corrected thin section analyses of the limestone of block no. III.

Table 7.1 The particle size (fossils) distribution data for thin section analyses of the limestone of block no. I.

Table 7.2 The particle (fossils) size distribution data for thin section analyses of the limestone of block no. II.

Table 7.3 The particle (fossils) size distribution data for thin section analyses of the limestone of block no. III.

Table 8.1 Cumulative frequency curves of particle (fossils) for sieve size distribution obtained from thin section data of the limestone of block no. I.

Table 8.2 Cumulative frequency curves of particle (fossils) for sieve size distribution obtained from thin section data of the limestone of block no. II.

Table 8.3 Cumulative frequency curves of particle (fossils) for sieve size distribution obtained from thin section data of the limestone of block no. III.

Table 9.1 Percentage of Ca, Mg, Ca/Mg and Mg/Ca in the limestone of block no. I (Surface samples).

Table 9.2 Percentage of Ca, Mg, Ca/Mg and Mg/Ca in the limestone of block no. I (bore holes sample).

Table 9.3 Percentage of Ca, Mg, Ca/Mg and Mg/Ca in the limestone of block no. II (Surface samples).
Table 9.4  Percentage of Ca, Mg, Ca/Mg and Mg/Ca in the limestone of block no. II (bore hole sample).
Table 9.5  Percentage of Ca, Mg, Ca/Mg and Mg/Ca in the limestone of block no. III (Surface samples).
Table 9.6  Percentage of Ca, Mg, Ca/Mg and Mg/Ca in the limestone of block no. III (bore hole samples).
Table 10.1  Chemical analysis of the limestone of block no. I (Surface samples).
Table 10.2  Chemical analysis of the limestone of block no. I (bore hole sample).
Table 10.3  Chemical analysis of the limestone of block no. II (Surface samples).
Table 10.4  Chemical analysis of the limestone of block no. II (bore hole sample).
Table 10.5  Chemical analysis of the limestone of block no. III (Surface samples).
Table 10.6  Chemical analysis of the limestone of block no. III (bore hole sample).
Table 10.7  Chemical analysis of the limestone (trace elements).
Table 11.1  Porosity of the limestone of block no. I.
Table 11.2  Porosity of the limestone of block no. II.
Table 11.3  Porosity of the limestone of block no. III.
Table 12.1  Pore-size distribution in the limestone of block no. I.
Table 12.2  Pore-size distribution in the limestone of block no. II.
Table 12.3  Pore-size distribution in the limestone of block no. III.
Table 13.1  Pore-space development in the limestone of block no. I.
Table 13.2  Pore-space development in the limestone of block no. II.
Table 13.3  Pore-space development in the limestone of block no. III.
