CHAPTER V

CONCLUSION
CHAPTER V

CONCLUSION:

The following are the significant findings of the study:

1) Ultrasound has inhibited the tumour growth.
2) Degeneration of the tumour can be induced by Ultrasound.
3) Decrease in the DNA, RNA and Proteins content of the tumour tissue is an evident effect of ultrasound on the biochemical pathways.
4) Intensity of the Ultrasound plays a vital role in the irradiation than the time of exposure.
5) Surfacial tumours can be treated with Ultrasound.
