

LIST OF TABLES

CHAPTER 1

- 1.1 List of primary coagulation factors involved in blood coagulation cascade

CHAPTER 2

- 2.1 Proteolytic activity of King Cobra venom with protease specific inhibitors; PMSF, EDTA and 1, 10-Phenanthroline.

CHAPTER 3

- 3.1 Effect of four venoms *O. hannah*, *N. naja*, *V. russellii* and *E. carinatus* on the bleeding time in mouse model
- 3.2 Plasmin-like activity of four venoms.
- 3.3 IC₅₀ values for *D. russellii*, *N. naja* and *O. hannah* venoms for their inhibition on agonists induced platelet aggregation in PRP.

CHAPTER 4

- 4.1 Inhibition of lethality of *O. hannah* venom (2 LD₅₀ dose) with increasing amount of BSV, VB & OH-IgG antivenoms.

CHAPTER 5

- 5.1 Effect of specific protease inhibitors (5 mM concentration each) on the activity of protease.
