

Acknowledgement

Research is a process of finding something new out of existing. This requires deep insight in a particular area and knowledge of various analytical techniques and tools. Apparently it is a single handed task but actually it is based on cooperation received from many. Right from deciding a topic till the conclusions and findings, it was a long journey in which as a researcher i was supported by many persons. Without their support the journey was going to be even more difficult. This is the time when i express my sincere gratitude towards them.

First of all i am thankful of God for cultivating a seed of research in my mind. It is his grace who made me the student of my guide Dr. Harish Chandarana, Head, Commerce Department, Shri H.N. Doshi Arts & R.N. Doshi Commerce College, Wankaner. I am really thankful of my Guru Dr. Harish Sir for helping me throughout the process of research. Without his support the research would have not taken place at all. Thank you very much sir.

I am also thankful of Dr. Alok Kumar Chakrawal Sir, Professor at Department of Commerce, Saurashtra University. He is my mentor at the time of my master's degree programme which i completed at Department of commerce. He helped me whenever i was in need at any stage of research. Thank you very much sir.

I am also thankful of Dr. Dakshaben Gohil, Head of Department of commerce and my Guru, all the teaching and admin staff of the department for helping me. I am also thankful of Dr. Kaushal Bhatt, Asst. Professor of GTU, Ahmedabad, for helping me in framing questionnaire and various research technicalities. I am thankful of my cousin Ajay Joshi, Superintendent in custom excise, for choosing the type of industry.

I am also thankful of my friend Dr. Dushyant Nimavat sir, Assistant professor, for continuous support and motivation. I express my gratitude towards the honourable secretary of our college sadhu Tyag Vallabh swamiji for providing appropriate environment and infrastructure to encourage research. I am thankful of my Head of the Dept. Jayesh Zalawadiya sir and my colleagues for adjusting my schedule whenever needed.

The data collection was one of the biggest challenges for me. I am really thankful of my friend and colleague Bhavin Popat sir for helping me in collecting data from one industry. Chintan Vora Sir, Asst. Professor at Hariya College, Jamanagar, has also helped in collecting data from that region. So i am equally thankful of him. I am very thankful of the students namely Kaif Pirzada, Sidharth Sonchhatra and Mitali Rughani for helping me in data collection.

And last my family members, father Kumudchandra L. Thaker, mother Hansaben K. Thaker, wife Madhavi J. Thaker and my sweet son Rohan, thanks all. They all have become a continuous source of encouragement and motivation for me. They have adjusted a lot to complete my research.

Date: November 2015
