List of Tables

1  Data sources                               9
2.1 Lithostratigraphic succession for South Gundal basin  16
    2.1.1 Investigation depth for EM34 at various intercoil spacing  31
3.1 Comparison of Mulehole, Maddur and Terakanambi monthly rainfall  50
3.2 Average annual rainfall of the study areas  51
3.3 Average relative humidity, wind, velocity, temperature, PET & AET  52
4.1 Resistivity values with different rock units at Mulehole watershed  56
4.2 Percentage of all the models  76
4.3 Results of different inversion model  77
4.4 Resistivity results of Terakanambi watershed  86
6.1 Analytical methods employed for physico-chemical analysis of water samples  114
6.2 Temperature values of water samples  114
6.3 pH values of water samples  115
6.4 The (EC) value of water samples  116
6.5 Relation between Water Conductivity and Mineralization  116
6.6 TDS values of water samples  118
6.7 Classification of water according to (TDS) content  118
6.8 Calcium concentration of water samples  121
6.9 Magnesium concentration of water samples  123
6.10 Sodium concentration of water samples  123
6.11 Potassium concentration of water samples  125
6.12 HCO\textsubscript{3} concentration of water samples  128
6.13 Sulphate concentration of water samples  128
6.14 Chlorine concentration of water samples  130
6.15 Nitrate concentrations of water samples  131
6.16 Phosphate concentrations of water samples  133
6.17 Analytical results of water samples of the study area  136
