Acknowledgements

First and foremost, I am grateful to my supervisor, Prof. Sharath Ananthamurthy, who constantly guided me and created new pathways for me throughout my PhD. Without his guidance and sole support, this thesis would not have been possible at this stage and not have taken the form it has. I am thankful to him for entrusting me with this and for being an inspirational advisor and teacher. I thank him for providing freedom to explore my research interests and for correcting me when I made mistakes. It has been a great experience to grow as a researcher in Prof. Sharath Ananthamurthy’s lab.

I am grateful to Prof. R Somashekar, University of Mysore, for introducing me to Prof. Sharath and for moral support. I thank him for showing enthusiasm about my work and progress and for being a great and inspirational teacher. I thank him and his wife Dr. Swarnamala Sirsi for all their help and support throughout my career.

I am thankful to Dr. Sarbari Bhattacharya for the constant guidance and friendly support throughout my work. Dr. Sarbari Bhattacharya is truly an inspirational person. I thank her for being a great appraiser in our group; I have benefited immensely from her positive influence.

I thank Dr. Raghu A, my research senior in our lab, for sharing his experience in setting up of optical tweezer and for helping me with many technical issues and also for impressing me with his unbeatable hard work. He provided an invaluable support in my early stage of my PhD and has been a great friend in lab as well as outside. I also thank Dr. Satyajith K T for all his help and valuable support throughout my work. I thank Mr. Nagesh B V and Mr. Praveen P for their wholehearted support, experimental and intellectual help, without which I could not have afforded the time to complete this work. I thank Marjan Mosalleipour for useful discussions and providing polystyrene beads and Shruthi S Iyengar for her help at the final stages. I thank Durgesh Datar and Dyavappa B M for their help and companionship.

I acknowledge Prof. R. Damle and Prof. Rajan V Anavekar, for allowing me to use the sensitive balance while preparing the samples. I thank Dr. B N Lakshminarsappa for providing distilled water for sample preparation. My warm gratitude is given to Dr. A. R. Ushadevi, for her intellectual support and timely help. I thank Dr. M K Rabinal, Karnataka University, for providing silver nanoparticles to carry out this work. I thank Dr. Meera for
her positive advice. I thank Prof. Ramani, Prof B. A. Kagali and Prof. Rajan V Anavekar for their help in the administrative work.

I would like to thank Dr. D C Mohana and his student Praveen P, Department of Microbiology and Biotechnology, BU, for helping me to grow bacterial strains. I sincerely thank Prof. Anusuya D, Department of Botany, BU, for providing the agro bacterial strains to carry out this work and for the fruitful discussions.

I would like to acknowledge Dr. J X Tang for sending me the codes for getting microrheological properties. I acknowledge Prof. Sadiq Rangwala, Prof. Pramod pullarkat and Prof. Raghunathan, RRI, for providing optics to carry out this work. I also thank the support of Mr. Gopinath for machining the different mounts and for other related works, Mr. Srihari for the infrastructure in my lab and Apurba paul for providing polystyrene beads and useful discussions.

I thank Praveen D for spending his useful time with me when I was working in the lab and bore with work and for his never ending help, support and fruitful discussions on my research work.
