ACKNOWLEDGEMENTS

Looking back, I am surprised and at the same time very grateful for all I have received throughout these years. I take this opportunity to thank all who have helped me in moulding my thesis.

I would like to thank my thesis supervisor, Professor H. S. Ram Mohan, who provided the motivation and direction for this work. The confidence he had in me led me to work on my own ideas. His help throughout the research period even in days of trial was invaluable in the development of my thesis. I express my sincere and deep admiration for his patience and enthusiasm to make me write my research outputs, in spite of his busy academic and administrative schedules. I extend my sincere thanks to Dr. K. R. Santosh, Member, Doctoral Committee for his time and valuable suggestions. I thank the Head of the Department Dr. K. Mohankumar, for providing all the facilities required for my research and all my teachers, Dr. C. K. Rajan, Dr. C. A. Babu, Sri. B. Chakrapani and Dr. Madhu V. for their advices throughout.

I wish to express my warm and sincere thanks to Prof. P.V. Joseph, Emeritus Professor, Department of Atmospheric Sciences, who helped me through several discussion of the research topic. I would like to thank all the office staff of the Department, especially Mr. Santhosh, Dr. Sreedevi M. G., Mr. Yasodharan, Mrs. Shaila, Mr. Jaison, Mrs. Rathi and all others for their timely help in many aspects.

Acknowledgements are due to IMD, ECMWF and NCEP for providing data for carrying out my work. I thank University Grants Commission, Govt. of India and Cochin University of Science and Technology for providing financial support for my research. Dr. D. S. Pai from India Meteorological Department, Dr. Sanjay of Indian Institute of Tropical Meteorology, Pune and Prof. Jon Ahlquist from Florida State University had helped a lot in
clearing my doubts on statistical and mathematical techniques. I am indebted to Dr. Bindu G, Dr. Venu G. Nair and Mr. Johnson Zacharia for their advice and their scholars of the Department for their friendship and collaboration; special thanks to Abish, Asha, Anila, Resmi, Smitha, Nithin, Sivaprasad, Vijayakumar and Jayakrishnan. I am grateful to Dr. Vinu K. Valsala, Dr. Bijoy Thompson, Dr. Roxy Mathew, Ms. Preethi Bhasker and Dr. Prasanth A. Pillai for sharing their views, reprints of publications and discussions and Krishnamohan for helping me in some of the computer related issues.

Deep and sincere thanks to my brother Justin, sister Merly, brother-in-law Jebaraj and niece Deborah for their inspiration and constant support they gave me. They consoled me at the time of stress, they helped me to get through my life's darkest phase when both my parents passed away and they advised me to strive hard and helped me to fulfill my parents wish. It is a pleasure to share doctoral studies and life with the wonderful person Rajesh, my Husband, and it would have been certainly much harder to finish this thesis without him. He has helped me on endless errands that I have been asking him to do, even when he has been busy with his job. Many thanks to Achachan and Amma, sisters-in-law Rajasree and Rajani who supported me with patience for the successful completion of my thesis.

It is beyond words, to express thanks to my late parents, with whose blessings and prayers, in addition to their love, care, encouragement and hope I have completed this thesis work.

Last but not the least, I kneel down in profound humility and deep gratitude before Lord Almighty for showering his blessings and grace on me through all the stages of this humble endeavor and thereafter.

_Lorna R. Nayagam_
He covers the sky with clouds;
he supplies the Earth with rain
and make grass grow on the hills
