Acknowledgements

The five-year long voyage through the rough seas of research has come to an end. It is my pleasure now to have the opportunity to express my gratitude for all who made this journey smooth and enjoyable.

First and foremost, I wish to express sincere gratitude and appreciation to my supervisor Dr. Jatinder Madan, Associate Professor, Department of Mechanical Engineering, SLIET, Longowal. His invaluable guidance, continuous inspiration and enthusiasm coupled with an integral view on research have made a deep impression on me. He manages to strike the perfect balance between providing direction and encouraging independence. He has given a purpose and meaningful direction to my career in the field of engineering.

I also wish to pay my humble gratitude to my supervisor Dr. Pradeep Gupta, Professor, Department of Mechanical Engineering, SLIET, Longowal for his enlightening guidance, intelligent approach, constructive criticism, wholehearted and ever available help for solving the problems. He instructs me in the right direction and inspires to produce best out of me. His guidance and kind heart has enabled me to achieve the determined target.

I owe my profound gratitude and indebtedness to Dr. P. K. Singh, Head of Department (Mechanical Engineering), Dr. Rajesh Kumar, Convener - Departmental Research Committee (DRC), and other DRC members: Dr. V. Sahni, Dr. Jagtar Singh, Dr. Amandeep Singh Shahi and Dr. Kulwant Singh, for their valuable suggestions to improve my research work.

It is a pleasure to acknowledge the help I have received from each individual around me and the institutions as well. I am particularly indebted to Mr. Abhinav Krishan Mittal, a dear friend and research scholar at MNIT, Jaipur for extending help in VB.NET programming. I also feel privileged to be surrounded by knowledgeable and friendly colleagues, Prof. Anurag Misra, Prof. Seema Tinker, Prof. K. C. Sharma, Mr. Ranjit Singh, Mr. Prince Pal Singh, Mr. Roshan Lal Virdi, Mr. Bhuvnesh Bhardwaj, Mr.
Varun Sharma, Mr. Deepak Agrawal and Ms. Nitika Shukla for their encouragement at the very outset of my research work.

I am thankful to Mr. Om Prakash Verma and Sukhdeep Singh from M/s. Rockman Industries. Ltd., Ludhiana, India; Mr. Kashmira Singh, Mr. Manjit Singh and Mr. M. P. Singh from M/s. Super Auto Electricals Ltd., Faridabad, India; Mr. M. P. Sharma from M/s. Ajay Foundry Linkers, New Delhi, India; Mr. Anil Tatla and Mr. Dara Singh from M/s. Tatla Engineers, New Delhi, India for providing necessary details and support.

Of course, all this has been made possible by the blessing of my parents. I can never thank my parents, Mr. D. P. Sharma and Mrs. Nirmala Devi, enough; they are the most wonderful parents one can ever hope to have. Their unfailing emotional support, love and affection have carried me through trying circumstances. I would not have been able to enjoy this achievement fully without them. I am also thankful to all my family members for their love and support.

Just as one does not thank himself, expressing gratitude to one’s wife in public is not a Hindu custom. A wife is considered as a part of her husband, and her co-authorship is tacitly assumed in any book/thesis her husband writes. There is little doubt that without Kiran’s help this thesis would not have been possible.

My children, Sakshi and Vaibhav, missed their childhood activities, projects and games they ever wanted to play and share with me. Several times I refused their request to join them due to time limitations. Their love and understanding encouraged me to finish my work quickly. I dedicate my thesis to them.

I thank them all and the others who genuinely offered generous help. I appreciate everyone whom I have thanklessly missed to remember and have contributed towards completion of this work.

(Vijay Kumar)
