Acknowledgments

First and foremost, I wish to thank my research advisor Professor Harish Chopra, Department of Chemistry, Sant Longowal Institute of Engineering and Technology, Longowal. Words have no power to express my immense gratitude towards my revered research guide. His guidance, motivation, advice and training throughout the course of study helped me to bring this work in its present shape. His wide knowledge and logical way of thinking have been of great value for me. I am grateful to him for constant support and encouragement throughout this work. He helped me to not only grow as a researcher but also as an independent thinker. I am not sure that I could have got such opportunity to develop my own individuality and self-sufficiency by working anywhere else. I thank him for allowing me to be a part of his research group.

I am very thankful to Prof. V. K. Jain, Director, SLIET, for providing me facilities to complete this work. I am extremely thankful to Prof. Dhiraj Sud, Dean SLIET, for her support and guidance throughout my studies. I also express my sincere thanks to Prof. Kanungo, Prof. Rampal and Prof. Damanjit for their continuous support and guidance for this work.

I have worked with many people whose contributions deserve a special mention and I pay my gratitude to all of them in my humble acknowledgement.

I am extremely grateful to Prof. Charles S Vairappan, Director, Institute of Tropical Biologi, Universiti Malaysia, Kota Kinabalu, Malaysia. He was kind enough to provide me samples of selected marine organisms and support me to work in his laboratory for the isolation of compounds from some of the selected organisms. He gave me direction and knowledge particularly in the area of isolation and structure elucidation using NMR. I am also thankful to his research group and students who collected the organisms and helped me during my stay in his laboratory. Learning new techniques at University of Malaysia is unforgettable.
I extend my sincere and grateful regards to Prof. K. K. Bhutani, Director, NIPER, SAS Nagar for giving me permission and providing facilities to work in NIPER. I am extremely grateful to Prof. Sanjay M. Jachak, Department of Natural Products, NIPER, SAS Nagar for allowing me to work in his laboratory for the isolation of compounds from some of the collections and biological assays against COX1 and COX2 enzymes. I greatly appreciate the constant encouragement and helpful suggestions provided by him.

I am grateful to Dr Sandip B. Bharate of Indian Institute of Integrative Medicine, Jammu for teaching me molecular modelling and pharmacophore development, which was an important component of this work. I am also thankful to Mr Prashant Joshi of IIIM, Jammu for his help during these studies.

I am thankful to all my batchmates especially Garima, Nidhi, Simar, Abhinandan, Ajay, Avtar and others at SLIET for their constant support during my work at SLIET. I am thankful to RamJee, Shivani, Shiv, Alka, and Jagdeep for their help during my studies.

Last but not least, I extend gratitude for all mental and physical support to my husband Prof. Inder Pal Singh, my daughter Shizu and son Avani. Without their encouragement and understanding it would have been impossible for me to finish this work. I am thankful to my parents and my parents-in-law for their constant encouragement and support.

It is my privilege to be a student of Sant Longowal Institute of Engineering and Technology (SLIET), Longowal. The work carried out at SLIET has always been inspirational, challenging and exciting and has been a great learning experience.

I thank the almighty God for showering blessings on me.

Anu Bahl
