Acknowledgement

It is impossible to condense into a few words the debt of gratitude I owe to my supervising teacher, Dr. K.S.S. Nambooripad; suffices to say that this work would not have been possible, but for his active involvement and constant encouragement. Dr. R. Veeramony, Department of Mathematics, University of Kerala, meticulously read the entire manuscript, correcting many a slip in syntax. Mr. K. Kalyanaraman, Department of Statistics, University of Kerala, was ever willing to lend a helping hand whenever I ran into trouble with the computer. Finally, special thanks are due to my wife, Sherly, for emotional and intellectual sustenance during these years of research.
