ACKNOWLEDGEMENTS

The successful completion of this work owes much to the supervision and guidance of Dr. P. Yageen Thomas, Professor, Department of Statistics, University of Kerala, Kariavattom, Trivandrum. I am very grateful to him for his valuable guidance and constant encouragement without which the work would not have been completed in its present form.

I am indebted to Dr. T.S.K. Moothathu, Professor and Head, Department of Statistics, University of Kerala, with whom I have had some fruitful discussions about the work. With love and affection on me, he has even subjected himself to risk in rescuing me from difficult situations. His support and encouraging words upholds me in carrying out this work. I place on record my deep sense of gratitude to him.

I am much grateful to the University of Kerala for providing fellowship in the form of JRF during the initial period of my research work and also grateful to UGC, for awarding research fellowship in the form of JRF.

I would like to thank all the teachers and non-teaching staff of the Department of Statistics, University of Kerala for their encouragement and help provided during my research work. Finally I express my thanks to Mr. Prafullachandran, Librarian, Department of Statistics, University of Kerala, for helping me much in my search of research materials from the Library.

(N.K. Sajeevkumar)
