List of Figures

Figure 1.1: Samples from face image database ..........................3
Figure 1.2: Fingerprint image ............................................3
Figure 1.3: Hand geometry ...............................................4
Figure 1.4: A front view of human eye .................................5
Figure 1.5: DNA image ..................................................6
Figure 1.6: Keystroke dynamics .........................................8
Figure 1.7: Signature image ..............................................10
Figure 1.8: General block diagram of biometrics system ............13
Figure 3.1: Block diagram of IRDFB system .........................52
Figure 3.2: Samples from CASIA-Iris V1.0 database ...............53
Figure 3.3: Localized iris region .......................................54
Figure 3.4: Normalized iris of size 128*512 ..........................55
Figure 3.5: Normalized iris fragmented into two regions of size

  64*512 ........................................................................56
Figure 3.6: Block diagram of IRDIWT system ........................64
Figure 3.7: Segmented iris with occluding eyelids and eyelashes made

  black ........................................................................66
Figure 3.8: Daugman’s Rubber Sheet Model ..........................67
Figure 3.9: (a) Normalized iris before enhancement.

  (b) Normalized iris after enhancement .............................68
Figure 3.10: Conceptual diagram for 3 levels 2D Wavelet

  Decomposition ................................................................69
Figure 3.11: Graph of FAR and FRR for DWT method.................73
Figure 3.12: Graph of FAR and FRR for IWT method...............73
Figure 3.13: Graph of FAR and FRR for fusion of DWT and IWT
features.................................................................74
Figure 4.1: Block diagram of FSTIR system...........................79
Figure 4.2: The eye image of size 100*300..............................80
Figure 4.3: Binarized image in which the pupil is located.........80
Figure 4.4: Horizontally segmented portion of an eye image of size
70*300........................................................................80
Figure 4.5: Left half of iris image of size 70*35.......................81
Figure 4.6: Right half of iris image of size 70*35.....................81
Figure 4.7: Iris images of a person in CASIA database.............87
Figure 5.1: Block diagram of OSRCG system.........................91
Figure 5.2: Genuine samples from GPDS signature database ......92
Figure 5.3: Forgery samples from GPDS signature database .......93
Figure 5.4: Signature sample from local database..................94
Figure 5.5: Signature after applying DWT.............................95
Figure 5.6: (a) Original signature
(b) Resized signature...................................................96
Figure 5.7: Signature after skeletonization............................97
Figure 5.8: Exact signature area.........................................97
Figure 5.9: Vertical splitting of the signature.........................98
Figure 5.10: Horizontal splitting of the signature .................99
Figure 5.11: FAR and FRR against threshold correlation for local database.................................................................103

Figure 5.12: Plot of FAR and FRR v/s threshold for GPDS database.........................................................................104

Figure 5.13: Block diagram of OSRAF system.................................106

Figure 5.14: Signature after applying DWT..................................................107

Figure 5.15: Signature after skeletonization.................................108

Figure 5.16: Exact signature area.................................................................109

Figure 5.17: Horizontal and Vertical splitting of the signature......111

Figure 5.18: Geometric centre angle.................................................................112

Figure 5.19: Division of signature image..................................................113

Figure 5.20: Plot of FAR and FRR v/s threshold for local database117

Figure 5.21: Plot of FAR and FRR v/s threshold for GPDS database.........................................................................119

Figure 6.1: Block diagram of ISFOSR model.............................................124
