ACKNOWLEDGEMENTS

I express my deep sense of gratitude and indebtedness to my teacher and research supervisor Dr. P. Sreenuvasulu, Professor and Head, Department of Virology, Sri Venkateswara University, Tirupati for his stimulating perceptions, unstinted cooperation, constant encouragement and patience throughout the period of my research. Words fail me to thank him for guiding me in overcoming many difficulties encountered during the successful completion of this project.

It has been my special privilege to have had the good fortune of working under the able guidance of Dr. H.S. Savithri, Department of Biochemistry, I.I.Sc., Bangalore who has been a constant source of support and encouragement in the progress of molecular work at I.I.Sc. Her thorough knowledge and keen acumen helped me tide over many a complicated problem I came across during the course of my work. I do admit that without her best efforts, this thesis may not be in this shape.

My sincere thanks are due to Prof. N. Appaji Rao and Prof. M.R.N. Murthy for their concern during my stay at I.I.Sc.

My sincere thanks to the Registrar, I.I.Sc., Bangalore and Chairman, Department of Biochemistry for permitting me to work as a short-term researcher at I.I.Sc.

My grateful thanks are due to my teachers Prof. M.V. Nayudu (Retd’), Dr. K. Gopalakrishna Murthy (Retd’), Dr. D.V.R. Sai Gopal, Department of Virology, S.V.University, Tirupati for their precious suggestions, encouragement and constant help throughout my career.

I express my sincere thanks to Prof. M.V. Subba Rao, Professor and Head of Microbiology Department, Veterinary College, Tirupati for immense help in several ways than one and his colleagues for allowing me to use their laboratory facilities.

My thanks are due to Dr. K.S. Ravi, Centre for Application of Molecular Biology to International Agriculture, Australia; Dr. D.T. Robinson, Scottish Crop Research Institute, Dundee; Dr. D.V.R. Reddy, ICRISAT, Patancheru and Dr. V.G. Malathi, Indian Agricultural Research Institute, New Delhi for providing potyvirus group specific antiserum and antisera against narcissus latent in Sorghum potyvirus (Maharashtra), Sugarcane virus isolate from Uttar Pradesh, respectively. The assistance by Dr. Indi for the electron microscopic study, Mr. G.S. Girish for glycoprotein staining, Mr. Srihari Reddy for amino acid sequencing, Miss. Savitha for automated DNA sequencing and Mr.P. Elango for nucleotide sequence analysis, is gratefully acknowledged. My sincere thanks to Prof. Rama Mohan, Dept. of Neuropathology, NIMHANS and his group Mrs.Gayathri, Mrs. Hemalatha, Ms. Rajani for giving assistance in taking EM pictures.

My seniors and colleagues in the laboratory are of immense help to me and I thank Mr. T. Sathyanarayana (Citrus Research Education Centre, The University of Florida, Lake Alfred, Florida), Miss. G. Kiranmai, Mr. M. Venkataramana, Mr. K.
Venkata Subbaiah, Mr. P. Lava Kumar, Mrs. K. Varalakshmi. My special thanks to Mr. Venkatramana for his help, suggestions and support through the period of my study. My sincere thanks to Lavakumar for all the help, useful suggestions and critical comments during the course of investigation.

It is indeed a great pleasure to thank Dr. K. Gopinath (Dept. of Molecular Biology, Wageningen Agricultural University, The Netherlands) who initiated me into the intricacies of Molecular Biology who is a constant source of help and encouragement and moral support in successful completion of this project. I shall always cherish his care, love and affection. My stay at I.I.Sc. was wonderful due to the warm friendship of Joe, Mira, Rashmi, Krishna, Lokesh, Radha, Geetha, Srihari, Shobha, Zaimji, Bhaskaran, Leela, Durbaji, Jagath, Gopi, Ranjit, Sharma, Krishnan, Srinivas, B.P. Srinivas. I thank all of them and my sincere thanks to Joe, Gopi, Jagath, Mira, Ranjit for their help and encouragement and support in completion of some of the experiments. My special thanks to Joe and Mira for giving support and encouragement at critical periods. I thank Imbaraju, Muniraju, Patelappa for their assistance in the laboratory at I.I.Sc.

I extend my thanks to Mr. J. Deenadayal Naidu, Mr. C.V. Mohan Sarma, Mr. G.S. Muralidhar, Mr. P. Adinarayana, Mr. Yerram Reddy and Mr. Raghavaiah for their assistance during this study.

I extend my acknowledgements to the USDA PL480 Project No. IN-ARS-718 for providing the financial assistance during the tenure of my research.

I cherish the happy movements with my friends Mr. S. Yuva Sekhar, M. Sailaja, K. Rajani Prasanna, Uma for their support and encouragement. My special thanks to Mr. K. Venkateswara Raju and Mr. K. Venkat Rama Raju and their family for providing support, many moments of joy.

Words are not enough to express my deep sense of gratitude to my family members. I thank my father, mother, Suresh, Tejaswi, Naveen, Umaa, Umakka, Deepa, Baby, Nirmala, Bhanu, Prasad, Pradeep, Babu, Chinma, brother-in-laws and relatives for the faith they had in me and for their constant selfless support. It would have been impossible to me to complete the present study without the help and moral support of my husband, Mr. Suresh.

Thanks due to Mr. Sunil for taking good photographs and Mr. K. Venkat Rama Raju, Mr. Karthik for neat typing of the thesis.
