<tbody>
<tr>
<td>A</td>
<td>Weight data on means from Western and Indian Studies in kg</td>
<td>17 - 18</td>
</tr>
<tr>
<td>B</td>
<td>Height data on means for Western and Indian studies in cm</td>
<td>21 - 22</td>
</tr>
<tr>
<td>C</td>
<td>Chest circumference data on means for Western and Indian studies in cm</td>
<td>24 - 25</td>
</tr>
<tr>
<td>D</td>
<td>Sitting height data on means for Western and Indian studies in cm</td>
<td>28 - 29</td>
</tr>
<tr>
<td>E</td>
<td>Pelvic breadth data on means for Western and Indian studies in cm</td>
<td>31 - 32</td>
</tr>
<tr>
<td>F</td>
<td>Details of the first and second stage stratified sampling</td>
<td>41</td>
</tr>
<tr>
<td>G</td>
<td>Schools selected from different areas of Chittoor District</td>
<td>42</td>
</tr>
<tr>
<td>I</td>
<td>Map of Chittoor District</td>
<td>42a</td>
</tr>
<tr>
<td>H</td>
<td>Age and sex distribution of urban and rural school children</td>
<td>43</td>
</tr>
<tr>
<td>I</td>
<td>Number of observations collected for different age and sex groups areawise</td>
<td>44</td>
</tr>
<tr>
<td>J</td>
<td>Mean and velocity of weight data in kg for rural boys by mixed longitudinal analysis</td>
<td>54</td>
</tr>
<tr>
<td>TABLE 2</td>
<td>Mean and velocity of weight data in kg for rural girls by mixed longitudinal method of analysis</td>
<td></td>
</tr>
<tr>
<td>---------</td>
<td>-----------------------------------------------------------------------------------------------</td>
<td></td>

</tbody>
</table>
TABLE 10a
Calculated 't' and 'F' values for sexwise comparison of mixed longitudinal height data in rural and urban areas 67

TABLE 10b
Calculated 't' and 'F' values for areawise comparison of mixed longitudinal height data for boys and girls 68

FIGURE IV
Distance curves for height 68a

FIGURE V
Velocity curves for height

TABLE 11
Cross sectional means with standard deviations for sitting, sitting suprasternal and standing suprasternal heights in cm for boys and girls from rural and urban areas 72 - 74

TABLE 12
Cross sectional means with standard deviations for neck circumference and head dimensions in cm for boys and girls from rural and urban areas 76-78

TABLE 13
Cross sectional means with standard deviations for bi-acromial and chest measurements in cm for boys and girls from rural and urban areas 81-83

TABLE 14
Cross-sectional means with standard deviations for trunk and pelvic measurements in cm for boys and girls from rural and urban areas 86-88

TABLE 15
Cross-sectional means with standard deviations for arm span and upper-extremity measurements in cm for boys and girls from rural and urban areas 91-92

TABLE 16
Cross-sectional means with standard deviations for measurements of the lower extremity in cm for boys and girls from rural and urban areas 95-96
TABLE 17
Calculated 't' and 'P' values for various growth characteristics between each age group from 10-16 years amongst rural boys

TABLE 17a
Calculated 't' and 'P' values for various growth characteristics between each age group from 16-21 years amongst rural boys

TABLE 18
Calculated 't' and 'P' values for various growth characteristics between each age group from 10-16 years amongst rural girls

TABLE 18a
Calculated 't' and 'P' values for various growth characteristics between each age group from 16-21 years amongst rural girls

TABLE 19
Calculated 't' and 'P' values for various growth characteristics at each age from 10-15 years between rural boys and girls

TABLE 19a
Calculated 't' and 'P' values for various growth characteristics at each age during 16-21 years between rural boys and girls

TABLE 20
Calculated 't' and 'P' values for various growth characteristics between each age group from 10-16 years amongst urban boys

TABLE 20a
Calculated 't' and 'P' values for various growth characteristics between each age group from 16-21 years amongst urban boys

TABLE 21
Calculated 't' and 'P' values for various growth characteristics between each age group from 10-16 years amongst urban girls

TABLE 21a
Calculated 't' and 'P' values for various growth characteristics between each age group from 16-21 years amongst urban girls
### TABLE 22
Calculated 't' and 'P' values for various growth characteristics at each age from 10-15 years between urban boys and girls

107

### TABLE 22a
Calculated 't' and 'P' values for various growth characteristics at each age from 16-21 years between urban boys and girls

108

### TABLE 23
Calculated 't' and 'P' values for various growth characteristics at each age from 10-15 years between rural and urban boys

109

### TABLE 23a
Calculated 't' and 'P' values for various growth characteristics at each age from 16-21 years between rural and urban boys

110

### TABLE 24
Calculated 't' and 'P' values for various growth characteristics at each age from 20-15 years between rural and urban girls

111

### TABLE 24a
Calculated 't' and 'P' values for various growth characteristics at each age from 16-21 years between rural and urban girls

112

### FIGURE VI
Distance curves of height for early and late maturing girls based on cross sectional data

112a

### TABLE 25
Height data on means and standard deviations in cm for early and late maturing girls

113
