ACKNOWLEDGEMENTS

I express my profound gratitude and sincere thanks to Dr. J. V. Srinivasa Rao, Reader in Botany, Sri Venkateswara University College of Sciences, Tirupati, for his sustained help and guidance throughout the course of the present investigation.

I am also highly grateful to Professor V. S. R. Das, M. Sc., D. Phil. (Crea.), F. A. C. E., F. N. A., Director, School of Life Sciences, University of Hyderabad, India, for his constant help in several respects, particularly in inducing the spirit of thinking and reasoning in the analysis of the present investigation. My special thanks are offered to Dr. Herbert W. Mall, USDA-ARS, Western region, Tucson, Arizona, USA for his useful comments on this work.

I am gratefully indebted to Prof. F. A. Baker, Long Ashton Research Station, Bristol University, London, for generously supplying individual authentic samples of epicuticular waxes which are highly used in identifying the different components of the epicuticular waxes in scrub plants studied in the present investigation.

My thanks are also due to Dr. V. Devaraju Naidu, my husband, who with a great deal of understanding has been a source of inspiring strength to me throughout the work.
