CONTENTS

(1) General Introduction 1
(2) Material and Methods 33
(3) Chapter - I 51
Muscle components and electrical stimulations.
(4) Chapter - II 72
Glycolytic pathway during exercise and training.
(5) Chapter - III 103
Some aspects of protein metabolism during exercise and training.
(6) Chapter - IV 125
Citric acid cycle and associated ammonia metabolism during exercise and training.
(7) Chapter - V 144
Changes in protein ionizable groups and their impact on SDH kinetic parameters during exercise and training.
(8) General discussion 176
(9) Summary 196
(10) Bibliography I
(11) Publications of the author
