Starting beside the destination today when I look back to the road where I have been able to surpass number of milestones, so many faces pass before my eyes and names come to my mind. This is the moment to express my sincere gratitude towards all those near and dears, without whose unstinted support, encouragement and affectionate behavior, the journey would not have been pleasant and full of achievements.

“Guru Devo Bhav”. First and foremost, I bow my head at the feet of my Ph.D. guide Prof. D.G. Kuberkar and his loving wife. Both of them have showered an exemplary love upon me and never allowed me to feel that I am other than their daughter.

Prof. Kuberkar’s timely advice and disciplined approach have enabled me to dream of a doctorate degree in physics. He provided required insight and likewise aptitude for the research work. He always stood by me like a Father, Philosopher and Guide wished for my better exposure to the subject and encouraged during the stormy period. This is the result of his magic touch, which has converted me into a polished diamond, to shine out, through the length and breadth of the nation. It is his ever-flourishing inspiration like the holy river Ganga, that I have been able to submit this thesis. I am truly indebted to him from the bottom of my heart.
