

List of Figures

2.1.	Elements in teaching activities	34
3.1.	Research Design for the study	94
3.2:	Input-Output Model developed by Khanna (1994).	106
3.3.	Systematic approach to instruction	119
4.1.	Information processing models	147
4.2.	Thinking skills	148
4.3	Perspectives on education (Trowbridge & Bybee, 1996)	151
4.4.	Kolbe's learning cycle	163
4.5.	Levels of teaching	167
4.6	The constructivist-oriented model of Horsely et al (1990)	176
4.7	Role of education and interdependency of Science, Technology and Society	177
4.8	Engagement phase of 5E model	179
4.9	Exploration phase of 5 E Model	180
4.10	Explanation phase of 5 E Model	182
4.11	Elaboration phase of 5 E Model	185
4.12	Evaluation Phase of 5 E Model	186
4.13	Learning Cycle developed by Walker, (1998).	195
4.14	First phase of the 4MAT system, Reflective observation	199
4.15	Second phase of the 4MAT system- Abstract conceptualization	199
4.16	Third phase of the 4MAT system, Active experimentation	199
4.17	Final phase of 4MAT system, Concrete experience	199
4.18	A Contextual model of learning by Falk and Dierking (2000)	201
4.19	Production of Aspirin	228
4.20	Components of ATL Model	244
4.21	Diagram showing the preparation of 'White cement'	263
5.1	Components of ABL Model	344
5.2	The phases of the ABL Model	345
