# CONTENTS

## PART I. GRAVIMETRY

### CHAPTER 1. A CRITICAL EVALUATION OF THE IMPORTANT GRAVIMETRIC METHODS FOR THE DETERMINATION OF COPPER

- **Introduction** ..... 1
- **Organic precipitants** ..... 1
- **Electrogravimetric method** ..... 5
- **Inorganic precipitants** ..... 6
- **Summary** ..... 11
- **References** ..... 12

### CHAPTER 2. A COMPARATIVE ACCOUNT OF THE COPPER - IODIDE AND COPPER - THIOCYANATE REACTIONS

- **Introduction** ..... 14
- **Similarity between copper - iodide and copper - thiocyanate reactions** ..... 16
- **Summary** ..... 19
- **References** ..... 20

### CHAPTER 3. GRAVIMETRIC DETERMINATION OF COPPER AS CUPROUS THIOCYANATE

- **Introduction** ..... 22
Determination of copper as cuprous thiocyanate in

Acetic acid medium ... 29
Propionic acid medium ... 28

Comparison of the present method with the classical volumetric and gravimetric methods for the determination of copper ... 31

Determination of copper in acetic acid medium in presence of

Nitric acid ... 32
Hydrochloric acid ... 37
Sulphuric acid ... 40
Perchloric acid ... 42

Effect of ammonium thiocyanate concentration on the determination of copper in acetic acid medium ... 44

Discussion ... 46
Summary ... 47
References ... 48

CHAPTER 4. DETERMINATION OF COPPER III

PRESENCE OF ASSOCIATED ELEMENTS

Introduction ... 49

Determination of copper in acetic acid medium in presence of

Iron ... 49
Selenium and Tellurium ... 53
CHAPTER 5. (a) GRAVIMETRIC DETERMINATION OF COPPER IN ALLOYS AND ORES

(b) COPPER (II) - THIOCYANATE REACTION - A PROBABLE MECHANISM

Introduction .. 83

Application of the method to the analysis of copper in Devarda's alloy .. 64
German silver .. 87
Brass .. 89
Gun metal .. 93
Chalcopyrites .. 96

Conclusion .. 98

Copper (II) - thiocyanate reaction - a probable mechanism .. 99

Summary .. 101

References .. 102
CHAPTER 6. A REVIEW OF REPORT AND
GROVIMETRIC METHODS FOR THE
DETERMINATION OF SELENIUM AS
SELENIUM METAL.

Introduction .................................... 103

Different reducing agents
employed for the reduction
of selenium (IV) to metal ................... 103

Summary ........................................ 109

References ..................................... 110

CHAPTER 7. GRAVIMETRIC DETERMINATION OF
SELENIUM AS METAL USING ANTIMONIUM
TRIOXYANATE AS REDUCING AGENT

Introduction .................................... 113

Determination of selenium in
Acetic acid medium ........................... 122

Propionic acid medium ....................... 126

Comparison of the method with
the classical volumetric and
gravimetric methods for the
determination of selenium ................. 130

Determination of selenium in
acetic acid medium in presence of
Nitric acid ...................................... 131

Sulphuric acid .................................. 134

Perchloric acid ................................. 136

Summary ........................................ 138

References ..................................... 139
CHAPTER 5. (a) GRAVIMETRIC DETERMINATION OF SELENIUM IN PRESENCE OF ASSOCIATED IONS

(b) SELENIUM (IV) - THIOCYANATE REACTION - A PROBABLE MECHANISM

Introduction

Determination of selenium in acetic acid medium in presence of

- Tellurium
- Iron
- Bismuth
- Antimony
- Nickel
- Lead
- Mercury

Interfering ions

Successive gravimetric determination of copper and selenium from the same portion of the solution

The probable mechanism of the reaction between selenium (IV) and thiocyanate

Summary

References
PART II. "TERMINAL"

CHAPTER 9. A BRIEF REVIEW OF THE IMPORTANT INTERFERING "IIONS" FOR "THIOCYANATE USING AN OXIDIZING AGENT"

Introduction ........................................ 167

Different oxidants employed for the determination of thiocyanate .......................... 167

Summary ............................................. 173

References ......................................... 174

CHAPTER 10. POTENTIOMETRIC DETERMINATION OF AMMONIUM THIOCYANATE USING POTASSIUM DIOXONITRILE IN SULPHURIC ACID MEDIUM

Introduction ........................................ 177

Determination of ammonium thiocyanate .......................................................... 185

Determination of thiocyanate in presence of

  Chloride ...................................... 191

  Cyanide ...................................... 193

  Interfering ions ................................ 195

  Discussion ..................................... 196

  Summary ....................................... 198

  References .................................... 199

APPENDIX Five Reprints of the Publications.
