LIST OF TABLES

Table No. | Title                                                                 | Page |
----------|----------------------------------------------------------------------|------|
1         | Distribution of the sample on the basis of Leader's Check List Questionnaire Raw Scores. | 92   |
2         | Means, standard deviations and t test results of Leader's Check List scores of the three criterion groups. | 93   |
3         | Means and standard deviations of the raw scores of the three criterion groups in Sixteen Personality Factor Questionnaire (16 PF Test, Form C). | 95   |
4         | Stens (Standard ten) for industrial executives (Men). Based on 137 executives. | 96   |
5         | Means, standard deviations, mean differences and t test results of the sixteen personality factors raw scores of the top, moderate and low level success group executives (16 PF Test, Form C). | 104  |
6         | Means, Mean differences and t test results of the three criterion groups in Factor B (Intelligence). | 105  |
7         | Means, mean differences and t test results of the three criterion groups in Factor A (Affectothymia). | 107  |
8         | Means, mean differences and t test results of the three criterion groups in Factor C (Ego-strength). | 109  |
9         | Means, mean differences and t test results of the three criterion groups in Factor Q₃ (Self-sentiment). | 110  |
10        | Means, mean differences and t test results of the three criterion groups in Factor N (Shrewdness). | 112  |
11        | Means, mean differences and t test results of the three criterion groups in Factor G (Super ego-strength). | 114  |
Means, mean differences and t test results of the three criterion groups in Factor F (Surgency) 116

Means, mean differences and t test results of the three criterion groups in Factor H (Tendemindedness) 119

Means, mean differences and t test results of the three criterion groups in Factor I (Tendermindedness) 120

Summary of the analysis of variance for profile data of the sixteen personality factor raw scores among the executives of top, moderate and low level success groups. 125

Means and standard deviations of the raw scores of the top level success criterion group on ideational productivity and uniqueness. 129

Means and standard deviations of the raw scores of the moderate level success criterion group on ideational productivity and uniqueness. 133

Means and standard deviations of the raw scores of the low level success criterion group on ideational productivity and uniqueness. 136

Means, mean differences and t test results of the three criterion groups on ideational productivity. 140

Means, mean differences and t test results of the three criterion groups on ideational uniqueness. 143

Correlation matrix of the sixteen independent and a dependent variable used in the step-wise regression analysis. 150

First step in the step-wise selection procedure. 151

Second step in the stepwise selection procedure. 153

Third step in the stepwise selection procedure. 154

Fourth step in the stepwise selection procedure. 156

Fifth step in the stepwise selection procedure. 158
27 Sixth step in the stepwise selection procedure. 160
28 Summary table of the stepwise selection procedure for the contribution of personality variables to job success. 160a
29 Correlation matrix of the two independent and a dependent variable used in the stepwise regression analysis. 166
30 First step in the stepwise selection procedure. 167
31 Summary table of the stepwise selection procedure for the contribution of creativity variables to job success. 169
32 Correlation matrix of the eighteen independent and a dependent variable used in the stepwise regression analysis. 172
33 First step in the Stepwise selection procedure. 173
34 Second step in the stepwise selection procedure. 175
35 Third step in the stepwise selection procedure. 177
36 Fourth step in the stepwise selection procedure. 179
37 Fifth step in the stepwise selection procedure. 181
38 Sixth step in the stepwise selection procedure. 183
39 Summary table of the stepwise selection procedure for the contribution of personality and creativity variables to job success. 185
