ACKNOWLEDGEMENTS

The author takes this opportunity to express his deep sense of gratitude to Dr. M.G. Chakrapani Naidu, Professor and Head of the Department of Geology of the Sri Venkateswara University for suggesting the problem and for his inspiring guidance and constant encouragement throughout the progress of this work. The author is indebted to Dr. K.V. Suryanarayana, Reader in Geology in the Sri Venkateswara University, for his kind interest and active help in the completion of this work. The author thanks Dr. P.R.J. Naidu, Professor of Geology in the Punjab University for offering facilities to take a few x-ray powder photographs of minerals in his former laboratory in Madras and Dr. B.V. Govindaraju, Reader in Geology in the Mysore University for helpful suggestions in carrying out rapid analyses of rocks and minerals. The author is grateful to Prof. Virgil E. Barnes of the Texas University who confirmed a non-tektitic origin for the glasses collected by the author. The author is indebted to the numerous individuals connected with the mica mines for offering facilities to carry out studies in the mica belt area. Finally, the author expresses his thanks to his colleagues, Messrs P. Tirupati Naidu, G.V.S. Rama Rao and C.V.R.K. Prasad for their assistance in several ways.
