It is with immense pleasure, the author places on record his deep sense of gratitude to Prof. M.G. Chakrapani Naidu, Professor and Head of the department of Geology, Sri Venkateswara University, for this guidance, help and encouragement given throughout the course of his work, and for providing laboratory facilities.

Grateful thanks are due to Dr. K.V. Suryanarayana, Reader in Geology of S.V. University for his help and assistance in the field and for many helpful suggestions.

The help rendered by Dr. M.S. Murthy and Dr. R.J. Rao, lecturers in Geology of S.V. University is deeply appreciated.

The author is deeply indebted to Sri A.P. Ranganadha Swamy, Chief Engineer, Nagarjunasagar Dam, Sri T.C. Krishna Rao, Superintendent Engineer; Sri K. Srimakrishnayya, Executive Engineer, Public Works Department, Anantapur division; and Sri T. Hanumantha Rao, Executive Engineer of M.P.R. Project, for their kind help, assistance and facilities offered during the course of the field work round about the M.P.R. damsite.

The author is thankful to Dr. N. Leelananda Rao of Madras University for providing the unpublished distribution maps of dolerites of Chittor and Bommasamudram areas.

Thanks are due to Miss. S. Padmaja, medical student, for drawing a few of the diagrams.
Grateful thanks are due to Mr. J.J. Rao, research scholar in the department of Geology for the meticulous care with which the thesis is typed.

The award of the stipend, for about six months, under the Government of India Research Scholarship training scheme, and the financial assistance provided by Sri Venkateswara University to carry out part of the field work, are gratefully acknowledged.

The author has been greatly benefited by the constructive criticism and many helpful suggestions through stimulating correspondence with geologists overseas; John J.W. Rogers; Tom F.W. Barth; Hans Ramberg; R.C. Emmons; Felix Chayes; Thomas Donnelly; Earl Ingerson and Alex C. Tobi.

Finally, the author's unfailing gratitude is due to Dr. K.V. Subbarao, C.S.I.R. Senior Research Fellow, Department of Geology, S.V. University. He has continued, through the years, to be the constant source of enormous help and inspiration and an incomparable, delightful companion both in the field and laboratory. To him, the author offers his most sincere and heartfelt thanks.
