Contents

Preface

Chapter 1

1.1 Introduction
1.2 The economic paradox
1.3 Who are poor?
1.4 Why they are poor?
1.5 Measuring standard of living
1.6 The poverty line
1.7 Planning decision
1.8 Potential strengths & weaknesses
1.9 Pareto optimality
1.10 A few words on Sen’s work
1.11 Sen on Measure of inequality
1.12 Traditional calculation steps

Chapter 2

2.1 Part One: Inequality & Distribution of income

2.1.1 Introduction
2.1.2 Inequality of Income
2.1.3 Measure of inequality
2.1.4 Detailed discussion on Gini coefficient
2.1.5 Distribution of income
2.1.6 Some relevant statement
2.1.7 Sen on famine prevention
2.1.8 Will China’s success be India’s failure
2.1.9 Pareto Distribution
2.1.10 Estimation of Parameters.
2.1.11 Application and related distribution

2.2 Part Two: Poverty Control Chart

2.2.1 Introduction
2.2.2 Description of Control Chart
2.2.3 Control Chart for Pareto Distribution
Chapter 3
3.1 Introduction 64
3.2 Objectives 64
3.3 Hypothesis Testing 65
3.4 Description of the area under survey 66
3.5 Sampling Procedure 68
3.6 Step by step description of the survey, grid map and table 69

Chapter 4
4.1 Introduction 76
4.2 National Indicators 77
4.3 World development indicators 78
4.4 Computer programme for Calculation of Gini coefficient, Average, UCL, LCL and Lorenz curve parameters. 83
4.5 Computer programme to generate Pareto variates 86
4.6 Computer simulated income data, Calculation and testing of hypothesis. 87
4.7 Summary of results 147

Chapter 5
5.1 Introduction 149
5.2 Assumptions 149
5.3 Schemes 150
5.4 Basis of interpretation 152
5.5 Interpretation 154

Chapter 6
6.1 Introduction 160
6.2 Present situation 160
6.3 Workshop estate 164
6.4 Role of Local bodies 167
6.5 Suggestion for special schemes 168
6.6 Schemes to motivate tribal youth 170
6.7 Participation in local bodies 171
6.8 Suggestion for medicinal plants 172
6.9 Observation 172
6.10 Conclusion 174
6.11 Post-logue 175
