

**NORTH-EASTERN HILL UNIVERSITY  
DEPARTMENT OF ENVIRONMENTAL STUDIES  
SEPTEMBER, 2010**

I, Sanabam Sujen Singh, hereby declare that the subject matter of this thesis entitled, **“Geophysical Studies of the Deep Crustal Structure of the North East Indian Region using Magnetotelluric Technique”** is the record of work done by me, that the contents of this thesis did not form basis of the award of any previous degree to me or to the best of my knowledge to anybody else, and that the thesis has not been submitted by me for any research degree in any other University/Institute.

This is being submitted to the North-Eastern Hill University, Shillong for the award of the degree of Doctor of Philosophy in Environmental Science.

Dr. D. Walia  
(Supervisor)

**Dr. Devash Walia  
Associate Professor  
Department of Environmental Studies  
North - Eastern Hill University  
Shillong - 793022**

## ACKNOWLEDGEMENTS

First of all, I would like to thank Prof. S. G. Gokarn, Dr. Gautam Gupta and Mr. C. Selvaraj of the Indian Institute of Geomagnetism (IIG), Navi Mumbai for introducing me to Magnetotellurics, their encouragements and active participation during the field data collection. I am grateful to the Deep Continental Studies programme of the Earth System Science Division, Department of Science and Technology (DST), Govt. of India for funding the research project (ESS/16/172/2002) without which this research work would not have been possible. The training rendered by Dr. Ajay Manglik, NGRI, Hyderabad on inversion and modelling is also greatly acknowledged.

I would like to express my deep sense of gratitude and indebtedness to Dr. Devesh Walia, who has been a source of constant inspiration and encouragement throughout my Ph.D. programme. His affectionate supervision and vast experience in the field of geosciences has enabled me to accomplish the present research work.

I am thankful to Prof. B. K. Tiwari, Head, Department of Environmental Studies for providing the necessary laboratory facilities. Further, the faculty of the Department of Environmental Studies, Prof. L.K. Jha, Prof. O.P. Singh, Dr. D. Paul and Dr. S.S. Chaturvedi are acknowledged for their advice and constant encouragements during the research work.

I wish to express my deep sense of gratitude to Dr. Atul Saxena, Department of Physics, NEHU for his constant encouragement and valuable suggestions for improving the contents of the thesis. I take this opportunity to express my sincere thanks to Ms. Rashmi Saxena, TGT (English), Kendriya Vidyalaya, NEHU for her help during the preparation of this thesis.

My friendly thanks are due to Shipra Dutta, Neetu Hazarika, Yubaraj Sharma and Pavan Kumar for their ingenious help.

The financial support received from UGC as fellowship is gratefully acknowledged.

This acknowledgement remains incomplete without expressing my admiration to my wife Ms. Phalguni Kayenpaibam for her constant support and endurance.

SANABAM SUJEN SINGH
