ACKNOWLEDGEMENT

First and foremost, I express my profound gratitude to my guide and mentor Dr. Manoj Changat whose able guidance and seamless encouragement helped me in successfully completing this work.

I express my sincere thanks to Dr. Joseph Mathews (former Head, Department of Mathematics, S. B. College Changanacherry), for the fruitful and encouraging discussions that helped to finalize many results of this work.

My indebtedness to Dr. B. Kannan (Department of Computer Applications, CUSAT), who immensely helped me with inputs and suggestions throughout the course of my work and also to solve one of the theorems in Chapter 2 in the last phase of this research work is expressed herewith.

I express my deep sense of gratitude to Professor Sandi Klavžar, Faculty of Mathematics and Physics, University of Ljubljana, Slovenia for inviting me for a short visit to Slovenia under the bilateral Indo- Slovenian research project during the summer holidays in 2008 and providing all right milieu for carrying out the work. I also express my sincere thanks to Dr. Matjaž Kovše of the research group in Discrete Mathematics in University of Maribor for fruitful mathematical discussions and providing me with necessary research papers and materials.

I remember with extreme gratitude, Professor Boštjan Brešar, Dr. Iztok Peterin, and Aleksandra Tepeh Horvat of the research group in Discrete Mathematics in University of Maribor for helping me in solving the problem for betweenness in the Steiner intervals that ultimately formed the subject of Chapter 6.

I owe my deepest sense of gratitude to Dr. Raju, (Reader School of Social Science M.G University), who helped my in fine tuning the introduction and conclusion of this report.

I am deeply indebted to Dr. V. Nanda Mohan, Head, Department of Futures studies for providing all facilities and encouragement to carry out the research work.

I am grateful to Mr. S.P. Sanalkumar, Systems Analyst, Department of Futures Studies for his valuable suggestions, encouragements and timely advices throughout the research work.
I also acknowledge the holistic support given by Mr. Praveen Kumar, Project Coordinator, Department of Futures Studies.

My thanks to Ms. Ajitha, Research Scholar, Department of Futures Studies for helping me draw the pictures of the graphs that form part of the report.

My indebtedness is recorded herewith to Dr. M. N. Parasuraman, Lecturer in English, Govt. College, Chittur for devoting time to read and provide apt corrections whenever necessary.

I am also remembering Dr. Ramesh Kumar, Lecturer, Department of Mathematics, University of Kerala for examining the work and providing necessary corrections.

Thanks are due to Antony Mathews, Research Scholar, Department of Futures Studies and Lecturer, Department of Mathematics, S.B. College Changanacherry for the support rendered to me.

My heartfelt thanks to each and every member especially Sri. Shyma Prasad(former A.O), Sri Raj Mohan (A.O) and Librarian of Department of Futures Studies, University of Kerala.

I acknowledge the seamless support offered to me by the colleagues of the Department of Mathematics, Govt. College, Chittur for their constant support and encouragement throughout the course of work.

I would like to express my sincere thanks to the Principal Govt. College, Chittur who, without the slightest hesitation offered all possible support for the successful completion of this work.

I owe a lot to all my friends without whose encouragement and moral support, this work would not have been completed.

Last, but not the least, to my family, who have been a pillar of strength throughout the period and their love and care helped me, overcome the testing times.

G.N. Prasanth
