Acknowledgements

This thesis owes its existence to the help, support and inspiration by many people.

At the outset, I feel extremely ineffable in expressing my regards with great beholding and accolades to my distinguished guide Dr. Muralidhara, who is presently the Head of the Biochemistry and Nutrition Department, CSIR-Central Food Technological Research Institute, Mysore, for his learned counsel, constituted attention, incessant encouragement, transcendent suggestions, candid help and unstinted support at every step of my R & D work. In addition to being a guide for my doctoral research he has been an inspiring teacher with indispensable roles of fervor and candor in doing notable Scientific Research. His constructive criticisms during several discussions have provided me an insight to appreciate and view Scientific Research in a broader and newer perspective. Working with him gave me an opportunity to re-boost my scientific career and also an intellectual development of myself as a student. I thank him profusely from the bottom of my heart for the academic freedom and encouragement that he provided throughout my Doctoral Research.

I feel it an honor to express my deep sense of gratitude to Prof. Ram Rajasekharan, Director, CSIR - CFTRI, and Dr. V. Prakash, the former Director, CSIR-CFTRI for their support to carry out my research work in the institute.

I sincerely thank all the Distinguished Scientists and Members associated with the Women Scientist Scheme (WOS-A), sponsored by the Department of Science and Technology for according approval and sanction of funds for the Project titled “Mechanistic insights into the therapeutic propensity of spice components and phytochemicals against hyperglycemia induced oxidative stress/ mitochondrial damage in neuronal Cell models and their efficacy in an animal model of diabetic neuropathy” aimed at obtaining a higher degree.

I take this opportunity to thank previous HODs of Biochemistry and Nutrition Department - Dr. K. Srinivasan and Dr. P.V. Salimath, for their encouragement and support throughout my stay at the department. I wish to express my sincere thanks to the distinguished scientists of the department - Dr. Akhilender Naidu, Dr. Shylaja Dharmesh, Dr. UJS Prasad Rao, Dr. V Baskaran, Dr. GM Muralikrishna, Dr. YP Venkatesh, Dr. Kalpana Platel and Dr. RP Singh. I also thank all the staff members and research scholars of the department, who have helped me directly or indirectly during my research period. I would also like to extend my sincere thanks to Dr. S Muthukumar and all the members of animal house.
I wish to express my heartfelt thanks to Dr. Rajini PS, Scientist, FPIC Department for her kind help, support and encouragement during my Doctoral program. I take this opportunity to extend my gratitude to the staff of CIFS department for their help and support in using the instruments for some specific experiments. I also extend many thanks to Dr. MMS Bharath and his team, NIMHANS, Bangalore for their support and guidance during my cell culture studies.

It gives me immense pleasure to sincerely thank each and every member of my laboratory for their cooperation in carrying out the R&D activities. Be it Scientific Discussions / Analysis / Drawing Inferences, it had been a pleasure and passion to have it with Mr. Girish Chandran, I thank him profusely. It was equally interesting to discuss Science and carry out experiments with Mr. Denny Joseph. It had been wonderful to be in the company of Scientifically Tempered group comprising Mr. Gokul, Mr. Lalith Kumar and Dr. Chayakumari. I extend my thanks to Dr. Ravikumar Hosamani, Mr. Manjunath, Ms. Sriranjini and Ms. Greeshma for their support during my research work.

I would be failing in my duties, if I do not express my affectionate gratitude to my beloved father Mr. Narayan Prasad, Former Senior Scientist, Ministry of Defence, Defence Food Research Laboratory, Mysore, who had all along been a source of inspiration to me especially in my academic life and I express equally my humble gratefulness to my mother Ms. Chandra N Prasad; for my parents remain to be the foundation for whatever I am today. I take this opportunity to express my heartfelt gratitude to my uncle Mr. Suresh Prasad for all his support and blessings. I thank from the bottom of my heart my brother Mr. Sanjeev Prasad and my sister Ms. Sandhya Prasad who have always been motivating and guiding me not only during my Doctoral work but even in my personal life. I am thankful to my sister-in-law Ms. Suchitra for her whole hearted cooperation in all respects. I am thankful to the most loveable and the pupil of my eye – my dear son Master Taran, for cooperating with me and not disconcerting me in any way by understanding and adjusting with my time schedules during my Doctoral Research.

Finally, at this juncture of my life, achieving goals or working and rising towards a greater height in every walk of life gives me an immense pleasure and apt opportunity to thank all my near and dear ones who have been and continue to be a constant source of inspiration and insight.

My apologies to whomever I have failed to mention, I shall ever remain thankful to them all.

Sathya Prasad, N.
