ACKNOWLEDGEMENT

My sincere gratitude to Prof. H.S. Chhatpar for his valuable guidance throughout my research period. His constructive criticism from time to time has helped me make this thesis much better and his approachable attitude and kindness have enabled me to get over my practical difficulties. He has been a constant source of inspiration to me.

I am grateful to Prof. K.K. Rao for providing me the necessary facilities.

The constant encouragement and overwhelming help which I received from Drs. Anjana Desai, Trilok Parekh, Babita Parekh and Gagan Pandya has been an experience to treasure.

I acknowledge the help given by Arun Deora, Snehal Pandya and Manjiri Bakre during the course of this investigation.

I am grateful to all my seniors and labmates for their help and encouragement when needed, especially Rajesh Patel and Sharad Wankhade.

I would fail in my duties if I don't thank Drs. K.S. Rao, Department of Botany, Baroda, A.K. Shah, Biotechnology Centre, Baroda, K.S. Iyer, Institute for Research in Reproduction, Bombay, S.R. Udupa, Bhabha Atomic Research Centre, Bombay, S.K. Katyare and S.K. Srivastava, Department of Biochemistry, Baroda, B. Pilo and Sunita Patil, Department of Zoology, Baroda for their help and advice that I received from them.

I thank Sangeeta Pandya for her technical assistance in electron microscopic and photography work as well as Mr. Shaikh, Gujarat State Fertilizer Co., Baroda for helping in HPLC analysis.
Mr. Shirish and Mr. Pravin who very kindly arranged for the typing and printing of this thesis deserve a special thanks, which I gratefully extend.

Had it not been my parents and family pushing me whenever I faltered, this work would have remained unfinished. I appreciate their support in all my endeavors.

- UDDHAV KELAVKAR
