Eng.Tr.; What wonder is it that Calamine...roasted thrice with copper converts the later into gold?
Calamine, a zinc mineral, when roasted with copper in the presence of reducing organic matter, is likely to give rise to brass, which possibly passed as artificially prepared gold.

Eng.Tr.: Rasaka (Calamine): There are three kinds of it: namely of the colour of earth, of the appearance of treacle and of the colour of stones, what wonder is that Rasaka mixed with (certain organic matters) and roasted three times with copper, converts the latter into gold.
