ACKNOWLEDGEMENTS

This dissertation cannot be said as complete without the mention of the following personalities;

First and foremost, my gratitude to Prof. Bharat B. Chattoo, my guide and mentor who initiated me in the field of biotechnology, provided the right infrastructure, and focused me on this research.

I am thankful to Prof. Christopher J. Lamb for providing me with scientific advice during my stay at the Salk Institute, California, U.S.A. My thanks are also due to Dr. Qun Zhu of the Salk Institute, who channeled my thought processes in designing and deducing the experiments, and to Mr. Tsegaye Dabi for assistance with the tissue culture experiments.

I thank Dr. Usha Zehr of MAHYCO, for allowing me the use of greenhouse facilities at Kallakal, Hyderabad, and the staff of the R&D department for assistance with growing and multiplication of rice plants.

I sincerely thank my colleague Mr. Gopal Iyer, for his constant helping hand and his cherished friendship during this venture. Thanks are also due to all members of DCL for their support.

I am thankful for administrative assistance and secretarial help, to Mr. J.K.Nair, of MSU Baroda, and Ms. Cindy Doane of Salk Institute U.S.A.

I am indebted to the Rockefeller foundation, New York, U.S.A. and the Department of Biotechnology, India for financial support in carrying out this research project; and to my alma mater, the M.S. University of Baroda, who is admitting my thesis for Ph.D.

Finally, I thank my parents for their moral support and extreme patience during the course of my Ph.D. work.

My thanks to all who helped me throughout the past 5 years in bringing about this work to a successful conclusion.
