ACKNOWLEDGMENTS

Words probably cannot truly convey the meaning of 'Thankyou'. Nevertheless I feel obliged to express my gratitude to all those who have lend a hand to help me complete my research work.

More than anything, I thank Dr. (Mrs.) Anjana J. Desai, my research guide for giving me the freedom to plan and conduct my experiments, intervening with constructive criticisms and suggestions only when required. This type of guidance coupled with the support extended to me enabled me to achieve what I have achieved in my research work. Thank you M'am.

Away from the scientific front, my parents with their unending patience and understanding helped maintain my morale to keep me going. I love you and thank you for that and everything else.

Back at the department, the companionship of Dharmendra and Vivek in my scientific and 'other' endeavors was almost always a very pleasurable experience which will be long remembered. And Deepak who though had come much later in the day was always a welcome company. Thank you guys.

I also express my gratitude to Loui, Vikram, Shane, Anuranjini, Vaidehi and Madhavi who during the course of their dissertation work with me, in one way or other contributed to my work.

To Dr. R. S. Jadhav, I owe a special thanks for his many suggestions and help and also to Reena and Arpana who in their own ways helped me to get on with my work.

I also thank Sanjay, Drs. Geeta Thakker, Rajesh Patel, Uddhav Kelavkar and other colleagues who have at one time on other lend a helping hand which then was much needed and now much appreciated.

The fellowship provided by the Council of Scientific and Industrial Research (CSIR), India, is also very gratefully acknowledged.

Hanson K. G.
