ACKNOWLEDGEMENTS

My most revered thanks are due to my guide Dr. A. U. Javadekar, for his prompt and vigilant guidance. It is certainly a pleasure to work with him, in an atmosphere most democratic.

My most sincere thanks are due to Miss S. H. Divatia, Reader, Department of Philosophy, for her intelligent comments and her keen interest in the development of my thesis.

I cannot forget here Dr. B.S. Sanyal, Head, Department of Philosophy, I.I.T. (Bombay), April 1973, for introducing me to some techniques of modern logic, despite some personal inconveniences.

I am thankful to the U.G.C., under whose Research Fellowship Scheme, I was in a position to devote myself to this piece of research.

Yogini G. Nighoskar
